FEEFHS Executive Council:

1998-1999 FEEFHS officers:

President: John D. Movius, c/o FEEFHS (address listed below).
feefhs@feefhs.org

1st Vice-president: Duncan Gardiner, C.G., 12961 Lake Ave.,
Lakewood, OH 44107-1533. duncan@en.com

2nd Vice-president: Laura Hanowski, c/o Saskatchewan Genealogical Society, P.O. Box 1894, Regina, SK, Canada S4P 3E1
l.hanowski@sk.sympatico.ca

3rd Vice-president: Blanche Krbecek, 2041 Orkla Drive,
Minneapolis, MN 55427-3429. bkrbecek@worldnet.att.net

Secretary: Mila Ranovic, 5267 Spring Gate Drive, Salt Lake City,
UT 84117-6890. milara@aros.net

Treasurer: Marlene Nolte, 24000 Archwood Street, West Hills, CA
91307-3007. Mrlnnolte@juno.com

Other members of the FEEFHS Executive Council:

Founding Past President: Charles M. Hall, 4874 S. 1710 East, Salt
Lake City, UT 84117-5928. chall@burgoyne.com

The current editor of FEEFHS Quarterly: Thomas K. Eclund

To subscribe: Subscription is \$30 per year (4 issues) for personal subscriptions and \$40 for libraries and archives. A subscription request form is found at the back of this publication. FEEFHS members receive a free subscription as a benefit of membership.

To become a member: Simply fill out the application at the back of this publication and mail it along with your membership dues. Dues are \$25 per year for individuals and small organizations (under 250 members), \$35 per year for medium-sized organizations (250-500 members), and \$50 per year for large organizations (over 500 members). Special provisions exist for societies and non-commercial organizations in Eastern Europe who cannot afford to join. FEEFHS greatly appreciates sponsors and patrons who contribute more than the minimum amount to help offset the expenses of its many services, including its Web-site. The founders, elected and appointed officers, editors, and convention speakers all serve without compensation and thus contribute significantly toward FEEFHS goals.

FEEFHS, headquartered in Salt Lake City, is non-sectarian and has no connection with the Family History Library or The Church of Jesus Christ of Latter-day Saints, though we greatly appreciate the LOS contribution to family history in collecting, filming, and sharing genealogy record.

Sending mail: Please send membership requests, applications, dues, address changes, subscription requests, back-issue orders, etc. to: **Treasurer, c/o FEEFHS (address listed below).**

Articles: FEEFHS actively solicits original articles on topics significant to family history research in Central and Eastern Europe. Member societies are also invited to submit previously published articles for possible republication in *FEEFHS Quarterly*. Send article submissions to **Editor, c/o FEEFHS (address listed below)**. Submissions received by mail must be on 3.5" disk and in WordPerfect 5.1 or higher format. Disks cannot be returned. E-mail submissions are also accepted at **editor2@feefhs.org**. A style guide is available by request from the editors.

Who, What and Why is FEEFHS?

The Federation of East European Family History Societies (FEEFHS) was founded in June 1992 by a small dedicated group of American and Canadian genealogists with diverse ethnic, religious, and national backgrounds. By the end of that year, eleven societies had accepted its concept as founding members. Each year since then FEEFHS has doubled in size. FEEFHS now represents nearly two hundred organizations as members from twenty-four states, five Canadian provinces, and fourteen countries. It continues to grow.

About half of these are genealogy societies, others are multi-purpose societies, surname associations, book or periodical publishers, archives, libraries, family history centers, on-line services, institutions, e-mail genealogy list-servers, heraldry societies, and other ethnic, religious, and national groups. FEEFHS includes organizations representing all East or Central European groups that have existing genealogy societies in North America and a growing group of worldwide organizations and individual members, from novices to professionals.

Goals and Purposes:

The fall of the Iron Curtain opened up exciting new possibilities for genealogical research, but also generated significant new problems in knowing where to find the needed records. One goal of FEEFHS is to disseminate information about new developments and research opportunities in Eastern and Central Europe as soon as possible. This multi-ethnic federation is very effective in helping family historians with various ethnic and religious backgrounds who often seek similar types of information from the same hard-to-find locations. In the process members of FEEFHS have learned much more about available resources in North America and Europe. FEEFHS publicizes the publications, services, and activities of its member societies. FEEFHS develops on-line and printed databases of pertinent resources, maintains liaison with other organizations worldwide that share interests, serves as a clearinghouse for information on the existence and services of member societies, and promotes public awareness of member societies. FEEFHS also helps to create new ethnic or national genealogy societies where none exist but a need exists. FEEFHS volunteers are in active indexing selected FHL microfilm collections and East European record searches. UNITY-HARMONY-DIVERSITY is our motto. We welcome all societies and individuals, regardless of present or past strife in the homelands of Eastern Europe.

Services:

FEEFHS communicates with its individual and organizational members in many ways:

- 1) *FEEFHS Quarterly*, formerly *FEEFHS Newsletter* with cutting-edge articles, published quarterly since December 1992.
- 2) FEEFHS tables at major national, state, and regional conferences. This started in the spring of 1993.
- 3) FEEFHS International Convention in North America, held each spring or summer since May 1994.
- 4) *FEEFHS Resource Guide to East European Genealogy*, published 1994-1995 (replaced by FEEFHS website).
- 5) FEEFHS "HomePage" on the Internet's World Wide Web since mid-May 1995. This large "destination" website includes a weekly FrontPage Newsletter, a HomePage/Resource Guide listing for all FEEFHS member organizations, surname databases, detailed maps of Central and Eastern Europe, cross-indexes to access related sources, and much more. The address is: <http://feefhs.org>.
- 6) Regional North American conferences - the first was at Calgary, Alberta, Canada in July 1995.
- 7) Support of the *soc.genealogy.slavic* news-group, its FAQ (frequently-asked questions), and the Banat FAQ.
- 8) Referral of questions to the appropriate member organization, professional genealogist, or translator.

New Features

With volume 7 the publisher and editor of the *FEEFHS Quarterly* introduce what are hoped will become two long-term features aimed at promoting Central and Eastern European genealogy.

The first is a *Beginner's Guide* series that will outline elementary research procedures for each of the countries and ethnic groups represented in FEEFHS. Individual guides are geographic in orientation and will include, where appropriate, a brief history of the area described, complete with historical and modern maps. Guides are to directly address the opportunities and problems involved with the research process and discuss time span of records, record types (ecclesiastical, land, military, etc.), what records no longer exist or are rare, and language and epigraphy challenges. Specific attention, including illustrative material, will be given towards reading records with vital information. It is the ambition of the editor to include at least one *Beginner's Guide* in each future issue of the *FEEFHS Quarterly*. This feature begins with an article introducing Croatian genealogy. Other guides already scheduled for publication are for Belarus, the Czech Republic, Germany, Greece, Finland, Hungary, Latvia, Lithuania, Poland, Russia, and Sweden. The editor encourages correspondence from both member societies and individuals interested in authoring additional guides targeting areas of interest to *FEEFHS Quarterly* readers. A content outline and style guide is available on request from the editor.

The second new feature will spotlight member societies of FEEFHS. Highlighted in issues 1 and 2 of this volume are the *Immigrant Genealogical Society* and the *Glackstal Colonies Research Association*, both of the Los Angeles area. Articles on member societies will state the goals and objectives of each group, summarize the services they provide, and narrate the historical context of the organizations' inception and development. Included with each profile, when possible, will be a republication of an article of general interest from the group's newsletter or journal. The aim of this, of course, is symbiotic. The *FEEFHS Quarterly* hopes to generate increased personal involvement and interest in FEEFHS from member societies, while at the same time advancing the agenda of those societies to potential members and other interested readers. Groups that have an immediate wish to be profiled should contact the *FEEFHS Quarterly* editor.

The *FEEFHS Quarterly* currently has a shortage of material for publication. Members at large and other individuals are strongly encouraged to submit manuscripts dealing with Central or Eastern European genealogy to the *Quarterly* editor. The *FEEFHS Quarterly*, as a publication

representing a federation of many special interest organizations, is only as strong as the societies that sustain it. It is the hope of the editorial staff that each member society will take an active stance in supporting the *FEEFHS Quarterly* by submitting material from their memberships for publication. -Thomas K. Edlund, Editor

[Note: Inquires and submissions for the *Beginner's Guide*, the *Spotlight* feature, topical articles for publication and book reviews should be sent to editor2@feefhs.org. Material now or previously posted on the *FEEFHS HomePage* will not be considered for publication.]

Also in this Issue

In addition to Thom. Edlund's *Beginner's Guide* to Croatian research and the articles highlighting two of FEEFHS member societies, this issue contains several helpful research articles. Steve Blodgett, who gave an excellent overview of the EWZ films in our last issue, provides information about Czech military records. Jim Pelikan and Duncan Gardiner explore a case study of Galizien and Bohemian research. Kahlile continues his series of articles about new areas for genealogy with a piece on Macedonia. Chuaney Riddle explains strategies for descendant researchers. And Jerry Frank gives a useful summary of German migrations to Eastern Europe.

In our Web Update section, John Movius, President and Webmaster, gives a rundown of the latest news about <http://feefhs.org>. Another regular feature, the report on significant additions to the web site, has a new look.

FEEFHS 1999 International Convention is coming soon. See the tentative list of lecturers and topics on page 78, followed by an official registration form. If you have not already done so, please free to cut that page out and mail it in so that you can join us at the convention. -Joseph B. Everett, Managing Editor

From President John D. Movius

FEEFHS Salt Lake Chapter

The first meeting of the FEEFHS Salt Lake Chapter was held in the Flil., B-1 classroom on 18 May 1999. It was scheduled to coincide with the visit by Henning Schröder of Gummersbach, Germany. We thank Henning for his presentation on "What's New in German Genealogy". While the inaugural attendance was not large, it did include a "Who's Who" of professional Germanic genealogists in Utah: Thomas K. Edlund, Charles M. Hall, Horst A. Reschke, Trudy Schenk, A.G., and Marion Wolfert, A.G.

One of the purposes of this group is to gather all FEEFHS members in Utah (and others visiting the FHL) to meet and hear lectures by prominent FEEFHS member society genealogists and other professionals. By not having a fixed monthly meeting date, it will remain flexible and will be able to showcase, on short notice, visiting genealogists from around the western hemisphere and the world. To stay current, bookmark the FEEFHS Salt Lake Chapter home page at <http://jeefhs.org/usa/utlfeefhs/frgslccf.html> on your web browser and check it every so often.

This chapter also will function as a home base support group when FEEFHS returns to Salt Lake City every two or three years for its conventions. FEEFHS conventions have been held here in 1994 and 1997. We return to Salt Lake City on 22-24 September 2000 for our 6th international convention at the Best Western Salt Lake Plaza.

Founders of the FEEFHS Salt Lake Chapter are your president and Charles Hall. Founding officers include Movius as president, FHL cataloger Shon Edwards as vice president and Flil., cataloger Allan Morgan as secretary-treasurer. The advisory board includes Charles M. Hall, Thomas K. Edlund and Horst A. Reschke.

The next chapter meeting after this issue is published will be a joint meeting with the Silesian-American Genealogy Society (SAGS) on Tuesday 7 September 1999 at 7:00 p.m. in classroom 121 on floor B-1 of the Family History Library. Sonja Hoeke-Nishimoto, A.G., a full time FHL reference trilingual specialist with expertise in Germany, Switzerland, Poland and the Netherlands, will speak on "New Ways to Research Your Schlesien Ancestors".

Sonja was born in Gennany of refugee parents from Wischnitz (also called Kirschen), Kreis Tost-Gleiwitz, Schlesien, Germany; now called Wißnicze, Gliwice, Katowice, Poland. She will discuss her unique extraction program dealing with Wisnicze birth and marriage records (1754-1900) - see <http://jeefhs.org/pllk.atowice/gliwice/wisnicze>. She will also review other sources of Silesian genealogy on and off the World Wide Web.

In attendance as co-sponsor of this lecture will be SAGS president and FEEFHS online SILRL (Silesian Research List) coordinator, Joe Reimann, of Salt Lake City. SAGS

was founded by Reimann, Hall, and Movius in 1997 to improve the lot of Schlesien record searchers in North America and elsewhere.

Y2K - Joke or Reality?

If the Y2K problem is just a joke to you, you may be entertained by the reports on the English monastic Y1K crisis (999 A.D.) and the Roman Y0K crisis (1 B.C.) at <http://lfeefhs.org/y2klbcy2kfun.html>. But if you are concerned about the realities of the problem, then you will be interested in the Y2K information that FEEFHS has compiled.

As a new board member of *Blue Chips-the Utah Computer Society-1* have been active in promoting awareness of the Y2K problem among friends and acquaintances. An article on what to expect as a genealogist from Y2K and how to prepare your computer in a rational way for the new millennium will appear in the next issue of this journal. The Y2K problem will also be the subject of my Immigrant Genealogical Society luncheon address at the FEEFHS 1999 international Convention on 25 September 1999.

In the meantime, you may want to obtain the free Microsoft CD-ROM with a software "patch" to inoculate your Windows 95 or Windows 98 Operating System against the Y2K problem. Go to <http://jeefhs.org/y2klbcy2k-ps.html> for more information.

FEEFHS Volunteers - Making A Difference

It's hard to think of FEEFHS as a live and functioning federation without giving pause to the incredibly important role that volunteers have played in our past, are playing now, and will be playing in the future.

Our governing body - the FEEFHS Executive Council, our founders, our convention organizers, speakers and staff, our web presence, and everything we do is completely based on volunteers doing their tasks for the love of genealogy. In truth we have never had a paid employee, consultant or any paid staff. Without these "in-kind" donations, our bank balance might be close to non-existent.

As FEEFHS matures into its 8th year, and our web portal enters its 5th year of growth, web volunteers are making a crucial difference to a growing number of genealogy record searchers worldwide.

Some of the most important projects that FEEFHS volunteers are involved in are our surname indexes. Why is FEEFHS working on compiling surname finding aids? One big reason is because the Family History Library cannot do it. The FHL is basically limited to cataloging their microfilm collection. It cannot index the films. Even with a sharp, motivated, and efficient five-man team cataloging records faster than they can be filmed, it is estimated it will take 215 years just to catalog all the Russian Orthodox church book

President's Message

microfilms at this rate!

Make no mistake about it, there are a lot of churches in Russia; and quite a few churches and archives elsewhere in the world, where 241 camera crews are now filming in 60 countries. Thus it should come as no surprise that even the FHL has limits on what it can afford to do. And frankly it cannot afford to index microfilms.

Yet it is surname indexes that appear to be an important key to the effective selection and use of FHL microfilms, especially large and complex collections, such as the Saxony court records.

The Saxony Court Record Project

The Genealogical Society of Utah (GSU) has been filming court records in Saxony because the church records have been unavailable. Repeated offers by the GSU to film the records have consistently been refused by Saxony church authorities. After over 40 years of such refusals, the GSU decided to microfilm records in the public domain. They began with filming records from the 113 court districts of the kingdom of Saxony at the Dresden state archive. At this time, several thousand microfilm reels have been made, and records from 76 of the 113 Amts (court districts) are available at the Family History Library.

To understand this complex collection sufficiently to be able to effectively use it, one must have access to the 6 reels of Findbücher (finding aids). These Findbücher show you exactly where to search. To make the Findbücher easier to search and more accessible, we want to post their contents on-line. Secondly, we want to create a surname index to the court records themselves and post it on-line, so we can harness those surnames to the power of a web search engine.

The FEEFHS Saxony Court Record Project (FSCR) began last winter to accomplish these goals. When Donna Turbes went online to search for Saxony ancestors last May, and visited the FEEFHS web site, she discovered ten of her ancestors in a FEEFHS Finding Aid to court records from Schönberg. She eventually added three more generations to her knowledge base this way.

In gratitude, she volunteered to index the other five court volumes for Schönberg (posted as FEEFHS Finding Aids last June) and is now hard at work typing the Findbuch Index pages for Adorf Amt, the first of the 113 Amts. Donna was our first FSCR volunteer and is still at it, typing with gusto in her spare time.

Others include Pat Ryan, typing Annaberg (Amt #3). Lisa Vorwerk is typing Chemnitz (Amt #13). Mary Gray is typing Ölsnitz i. V. (in Voigtland - Amt #69). Hilde Bruno is doing Oschatz (Amt #71) and then will do Dresden (Amt #18).

While this represents only 6 of the 113 Amts, it is an important start. Volunteers continue to knock on our Internet door at a regular rate and slowly but surely we will complete the indexing of all 113 Amts.

Other Indexing Projects

Another project announced by *Die Pommerschen Leute* is the surname indexing of the *landwirtschaftliches Adreßbuch (Addressbuch) der Provinz Pommern*. This 433 page volume, published at Leipzig in 1938, includes a directory of 12,000 Pommern farms and their owners and a 55 page index.

When computerized, the surnames from this volume will become another online FEEFHS Finding Aid. *Die Pommerschen Leute* newsletter, in cooperation with FEEFHS, has announced they are looking for 5 to 10 volunteers (from their 3,000 person subscriber base) to help create this FEEFHS online finding aid.

Jody Fairchild is just starting to index the surnames in the church records of Gunnarp, Sweden. Walter Rudolph, a Silesian record searcher, will shortly receive photocopies of book indexes or a microfilm number to index from FEEFHS that correspond to his interest in Silesian genealogy.

Prior projects, such as *Die Ahnenstammkartei des Deutschen Volkes* and the Romania gazetteer project—both suspended in mid 1998 (due to the webmaster going offline for six months to move home and office) will be reactivated as soon as possible.

In a like manner, your webmaster is prepared to match any member's genealogy interest with a candidate for surname extraction. Good candidates for FEEFHS Surnames Finding Aids exist for virtually every part of Europe and Asia covered by FEEFHS.

Contact your president atfeejhs@feefhs.org or send a SASE with your location interests to P.O. Box 510898, Salt Lake City, Utah 84151-00898. Let's join in a mutually satisfying project to search something new and leave an online surname index as a legacy of that search.

A Beginner's Guide to Croatian Research

© by Thomas K. Edlund; with Kahlile B. Mehr, MLS, AG

Background on Croatia

Croatia is a nation and land of remarkable diversity and depth. Originally organized in 1946 as a Republic of the South Slav Federation and now an independent country, Croatia is comprised of the old Austrian territory of Dalmatia, most of Istria, and the former Hungarian crown land of Croatia-Slavonia. It extends in a crescent from the fertile plain between the Danube, Drava, and Sava rivers west to the Gulf of Venice, and then southward along the Adriatic coast to the frontier of Montenegro. It is bounded on the north by Slovenia and Hungary, and on the east by Serbia. Within this crescent, borders follow those of Bosnia-Herzegovina south to the Cma Gora corridor. Prior to the end of World War I the population was 82% peasant. At this time the economy of Croatia-Slavonia was based on agriculture and cattle breeding; the mountain folk of Istria and Dalmatia have been traditionally either wine and olive growers, or fishermen and seafarers. The people of both

areas are primarily Catholic.

The Croats, or *Chrobdti Hrvdti*, migrated to the Danube valley in the 6th century C.E. from a legendary region called White Croatia. This area, believed to be largely in Ukraine, lies north of the Carpathian mountains between the Dnieper, Dniester, Pripet, and Vistula rivers. Their immigration brought them south along the Dalmatian coast to the Roman stronghold of Salona (conquered in 614)¹.

Fig. 1 - The Croatian coat-of-arms, ascribed to Stipan Driislav, ruler of Croatia from 969-997.

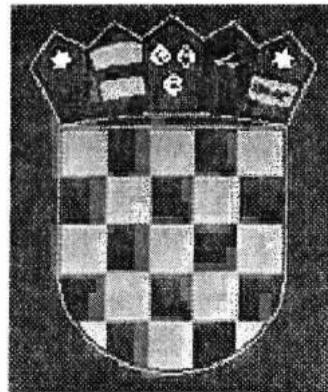

Fig. 2 - The Balkans in the late nineteenth century

Modern scholarship is investigating the possibility that the Croats are actually descended from a Persian tribe called the *Harahvati* or *Harouvatīs*, a people who occupied the area surrounding Mandabar in contemporary Afghanistan. Indeed, Croatian society of the seventh century bore striking similarities to that of Iran. Ancient Croatian customs and epic poetry have been cited as showing trace elements of Iranian sun and fire worship.²

Little is known concerning their early religion, as the pre-Christian Croats were illiterate. During the 7th century they were Christianized. Conversion stemmed from Emperor Heraclius of Byzantium's edict directing Pope John IV to undertake missionary activity among the Croats. This resulted in opening the Church's archdiocese at Salona and transferring its See to Spalatum. Included in the See's jurisdiction were all lands ranging from the Adriatic to the Danube and Drina rivers.³ By the late 9th century, the Croats had received the privilege of using their national language in church services.

Under pressure from the burgeoning Bulgarian, Byzantine and Frankish empires, local Croatian princes and tribal leaders coalesced for defense into larger political and military units. These eventually evolved into the two duchies of Dalmatia and Pannonia. With the Byzantine-Frankish Peace of 812, Pannonian Croatia was aligned with the Frankish empire, while Dalmatia became a titular Byzantine vassal state. Around 860, however, Pannonia liberated itself and joined the Dalmatian duchy, which also shook off foreign rule. By 880 Branimir was named the first king of a new and independent Croatia.

From the time of the first *Dux Croatorum*, the power and influence of Croatia grew. King Tomislav and his successors (through Slavac) successfully battled the Bulgarian empire and freed the eastern Adriatic coast from Venice. The leadership of Slavac was followed by that of Dimitar Svinimir (ruled 1076-1089). Svinimir, a man personally crowned by Pope Gregory VII, yet considered a papal lackey, was assassinated while enlisting support to battle the Seljuk Turks. Anarchy and civil war followed, with the Byzantines securing a position in Dalmatia. In 1091, Laszlo I of Hungary, claiming the throne as Zvonimir's brother-in-law, occupied most of Pannonian Croatia. Croatia became connected to Hungary for the next eight centuries. This relationship often changed; some kings attempted to abolish the partial union and to integrate Croatia with Hungary. On other occasions, Croats selected their kings independently.

Slowly, through the intrigue and incest which defined the Middle Ages, the power and influence of Croatia was whittled away. With the extinction of the Arpads (the Hungarian national dynasty who introduced feudalism to Croatia), the Croats crowned Ladislav, a Neapolitan prince, as King in 1403. This ruler, grossly uninterested in his newly acquired country, promptly sold Dalmatia to Venice, which ruled it for the next four centuries. The appearance of the Turks in the Balkans during the 15th century imposed a period of hard struggle. Bosnia, which under Kotromanic(h)

became an independent kingdom, fell in 1463. The Croat defeat at Krbavsko Polje in 1493 was followed by the defeat of Louis II of Hungary in 1526, and the greater part of Pannonian Croatia and central Hungary fell to the Turks. The once wide Croatian kingdom was reduced to *reliquiae reliquiarum*. Zagreb, formerly a heartland city, was now a border fortress and the new capital.

This story of decline climaxes with the opening of the Hapsburg period, a time of often brutal Germanization, which was later repeated during Nazi occupation. Briefly, affairs went from bad to worse. Notable highlights of obvious low points include the failed coup d'état of Prince Zrinski and the assassination of Archduke Francis Ferdinand at Sarajevo.

This then is the historical backdrop to the documents discussed below. The church books of Croatia and Slavonia reflect this cultural turmoil in many ways, most notably in linguistic diversity. The vital records of a single parish in northern Dalmatia may be written in Glagolitic, Italian, Latin, Croatian, and Hungarian. Generally, record types that form a topical concern for this "Beginner's Guide" are those microfilmed by the Genealogical Society of Utah (GSU) and available at the Family History Library (FHL) or any of its over 3,000 affiliate Family History Centers. Materials such as Napoleonic civil registration of the Illyrian provinces *et al.* are outside the immediate experience of the author, and so are not discussed.

Size and Scope of FHL Collection

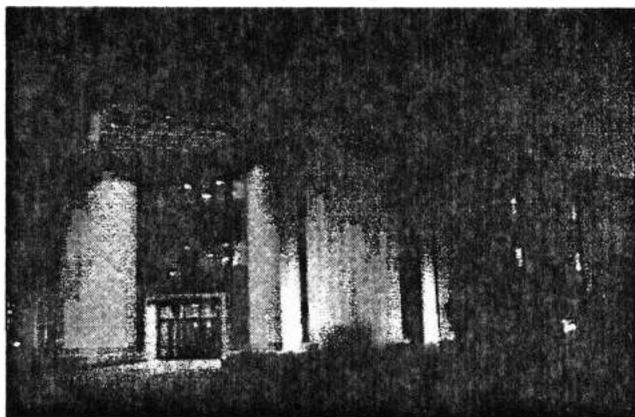

As of 01 May 1999 the FHL Croatian collection consisted of church books from 987 Roman Catholic, 217 Orthodox, and 13 Greek Catholic parishes. Also included are congregational records for 15 Jewish communities. The GSU has been filming in Croatia since March 1985. The original microfilming agreement, signed on 18 December 1984 by the then Departmental Director Richard G. Scott, was for 750,000 frames. While that exposure count was surpassed some 7 years ago, the Society still operates two cameras in Croatia. Microfilming thus far has been organized into 10 projects summarized as follows:

- 1) Various church books from the State Archive of Croatia
- 2) Orthodox church records of the Blaski diocese
- 3) Documents from Croatian district church archives
- 4) Church records from the State Historical Archive of Osijek
- 5) Material from the Historical Archive of Varasdin
- 6) Catholic church books from the Historical Archives of Zadar and Split
- 7) Orthodox church books from the Historical Archives of Zadar and Split
- 8) Church books from the Historical Archives of Dubrovnik
- 9) Records of the Rijeka archive
- 10) Records from the archive at Pazin

At present, over 4,000,000 manuscript pages on 2,692 35 mm. reels of microfilm, each comprised of an average of 750 frames (2 pages of text per frame) are cataloged and available for use. Primary areas of focus are the Austrian Kingdoms of Croatia, Dalmatia, Slavonia, and the Istrian peninsula. General span dates for these films are the latter 1500s to the 1940s.

The FHL also has extensive records filmed under contracts with the Austrian *Kriegsarchiv*, many of which deal with Croatian topics. These include, but are not limited to, 13,100 reels of Austrian military records and 511 reels of denominational registration (primarily Roman Catholic, Orthodox, Greek Catholic, and Jewish).

Fig. 4 - The Family History Library in Salt Lake City, Utah

Record Types

The record groups microfilmed in Croatia are diverse, forming a linguistic tapestry as varied and beautiful as the Balkans themselves. In the broadest terms the FHL collection for Croatia and Slavonia begins in the mid-1400s and continues through the end of World War I. Significant termination dates are 1869 for Army and Naval records, and 1920 for church books from the former Yugoslavia. Church records, in the main, begin in the later 1600s. The earliest examples are from the 1460s.

Linguistic diversity of the collection is greater than for most other geographic areas. Languages of primary interest are:

German: a Germanic language of the West Germanic group, spoken widely in Central Europe and the national language of Austria and Germany. German was the official language of the Austrian Empire, and as such, the language of record for the Austrian military.

Glagolitic: properly speaking, Glagolitsa is a method of writing introduced into the Balkans during the latter ninth century. The Glagolitic literature of Dalmatia, however, took on a character so unique that it can be considered a dialect of Serbo-Croatian. Glagolitsa has the same number of letters as the Cyrillic alphabet and the sound values are identical. In most circumstances one can read the text of a Glagolitic manuscript if (s)he is familiar with Croatian and the epigraphy.

Hungarian: a Uralic language of the Finno-Uralic group spoken throughout Hungary and parts of Croatia, Czech Republic, Romania, Serbia, Slovakia, and Slovenia. Hungarian has been written in a modified Roman alphabet since the 13th century, and is used often in Croatian church books of circa 1830-1890.

Italian: a Romance language spoken primarily in Italy with a sound system virtually identical to Spanish. Italian possesses a grammar similar to other Romance languages, has a simple syntax and is mildly inflected. Italian is common in the 18th-19th century Roman Catholic parish registration of Dalmatia.

Latin: an Indo-European language, moderately inflected, belonging to the Italic group. Latin originated among the tribes of the south Tiber River and spread throughout Western Europe with the expansion of Roman influence. Modern Romance languages developed from the Latin spoken in many parts of the Roman Empire.

Serbo-Croatian: a South Slavic language native to Croats and Serbs throughout the former Yugoslavia. Croatian and Serbian are actually the same language, save for a few insignificant vocabulary differences and the use of different alphabets.

Military Documents

The Austrian Empire existed as a political force from 1806 to 1918. Known as the Austro-Hungarian Empire after 1866, its boundaries at times contained parts or all of present day Austria, Bosnia, Croatia, Czech Republic, Hungary, Italy, Montenegro, Poland, Romania, Serbia, Slovakia, Slovenia, and Ukraine.

The administration of this empire required a vast military structure that played an important role in the lives of

- 1) Military Commissions. 1466-1866. These contain officers' commissions, instructions, appointments, information concerning military service, and biography.
- 2) Nobility Grants. 1636-1753. This is a collection of grants given for distinguished service or valor.
- 3) Vital Certificates. This is a small, but indexed, collection of birth, marriage, and death certificates.

Fig. 6 - Dubrovnik before the destruction of 1991

the citizenry. When, together with Germany, it was part of the Holy Roman Empire, the term of service was life (age c. 65). After 1802 the term of service was reduced to ten years. Universal conscription was introduced in 1868 and every male citizen was required to serve for three years. This was adjusted downwards to two years in 1912. The Austrian Army did not segregate its forces according to religion. Jew, Protestant, Orthodox, and Catholic served side by side. Excluded from military service were the clergy, nobility, government officials, and some workers in critical industries such as mining and agriculture.⁴

The overwhelming majority of military records relating to Croatia and Slavonia microfilmed by the FHL are from the Military Archives in Vienna. The *Kriegsarchiv* collection, unfortunately, is no longer intact. Many of the more recent documents were claimed by modern successor nations of the empire, including Hungary and Yugoslavia. *Kriegsarchiv* documents are divided into two large fonds: the records of the Central Command and those of individual units.

Records of the Central Command

This fond is the only possible source of information on Austrian soldiers and officers prior to 1740. Genealogically relevant series are:

- 4) Wills. 1639-1771. This collection is quite incomplete, yet indexed, and is arranged chronologically.
- 5) Pension and Assistance Records. These are organized by unit designator, i.e. regiment. This designation can be determined by consulting the *Schmata*, described in item seven, on the following page. The pension and assistance records include:

Pensions: 1749-1922
Invalid Office: 1723-1803
Orphans' Commission: 1702-1770
Soldier Orphans: 1770-1870

This record type provides name and rank, amount of the pension, a list of disbursements (with the total disbursed for each year), the location of payment, and the soldier's unit. Additional information of genealogical value is the location of payment, usually synonymous with the place of retirement.

- 6) Payment Books. 1753-1819. These documents are completely indexed and record pensions, wages, and salary data, with supplementary biographical data.

- 7) Army Rank and Regiment Schematics, 1583-1918. The Schemata are mainly printed materials that continue commission records. Contents are arranged first by force type (e.g. General Staff, Infantry, Artillery) and then by unit designator (e.g. 60th Infantry Regiment). Included are a name index and an explanation of abbreviations and symbols. Personnel are listed by force type and rank and also by unit and rank.

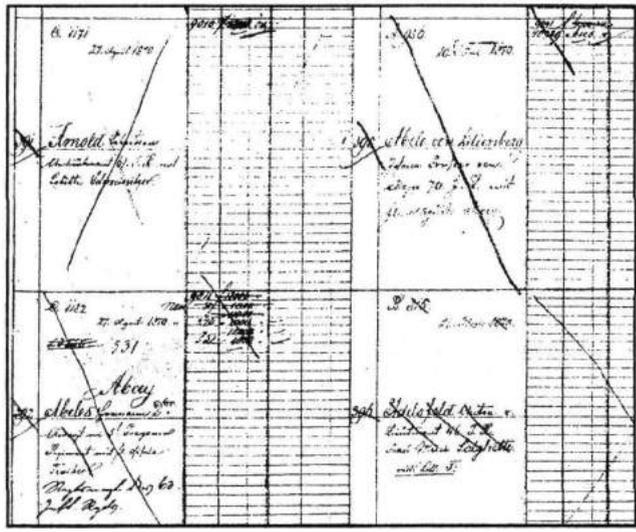

Fig. 7 - Marriage bond of Anton von Adesfeld, a lieutenant in the 46th Infantry Regiment (lower right)

- 9) Military School Records. Biography of students. Includes both the *Marine-Akademie* (1802-1918) and the *Kriegsschule* in Vienna (1871-1914).
- 10) Military Court Records. Archival documents include the Courts of Vienna (1753-1869), Graz (1784-1849), the *Invalidenhaus Wien* (1805-1860), and *Pettau* (1760-1859). All series contain valuable probate information. Some are indexed.

Records of Individual Units

Records for soldiers and officers after 1740 are also available in microform at the FHL. While many of the documents created after 1869 were transferred to modern nations created from the Austrian Empire, pre-1869 papers have been filmed and provide a complete record of each person who performed military service. Record series include:

- 1) Foundation Books. The Foundation books, or *Grundbuchblätter* (1820-1918) were a local continuation of the muster rolls. Their purpose was to establish a statistical foundation for the military service. They served as a running census of soldiers (and their needs), so the government could plan for horses, feed, rations, etc. After the introduction of universal conscription in 1869, foundation books were kept by the state military registration district. The records have a sheet for each soldier, which was updated annually. The example shown in Fig. 8 demonstrates the valuable information these documents can provide: Carl Heinrich Conrad Buttenschön, from Hamburg, Freistadt Hamburg, was born in 1769. He entered service on 8 June 1790 with the Prinz Württemberg Infantry Regiment no. 38. He held the rank of Petty Officer 15 October 1793, was transferred twice, and was then promoted to Chief Petty Officer 1 May 1800. He was married 18 May 1800 to

Elisabeth Du [sie] Plachy, made Junior Lieutenant 8 February 1813, Senior Lieutenant 7 September of Ule same year, and Captain 8 December 1817. Carl retired 15 August 1832 after 42 years and 2 months in the Army. He was 63 years old.

Fig 8 - Foundation Book Record for Carl Heinrich Conrad Buttenschön summarizing his 42-year career

2) Muster Rolls, 1740-1820. These records contain name of soldier, place of birth, age, religion, learned occupation, and marital status. After 1770 the rolls include names of dependant children. Musters were taken annually, and indicated soldiers' transfers. Arrangement is by unit.

Fig 9 - Muster List: leichtes Bataillon no. 1 of Dalmatia

3) Service Records, 1823-1918. These documents supplement the muster and foundation books with information concerning an officer's actual service record. The collection is quite voluminous and indexed. The records include each officer's true unit designator, name, rank, birth date, marriage information, religion, education, place and date of induction, post-induction schooling, decorations, etc.

4) Records of Ule Navy, 1760-1918. Materials from Ule series are identical to Ulose from the Army. Many of Ule records have been deaccessioned to the government of Croatia. Access is by unit.

5) Ecclesiastical Registers of Individual Units. These records are identical to Uleir civilian counterparts discussed below.

Denominational Vital Records

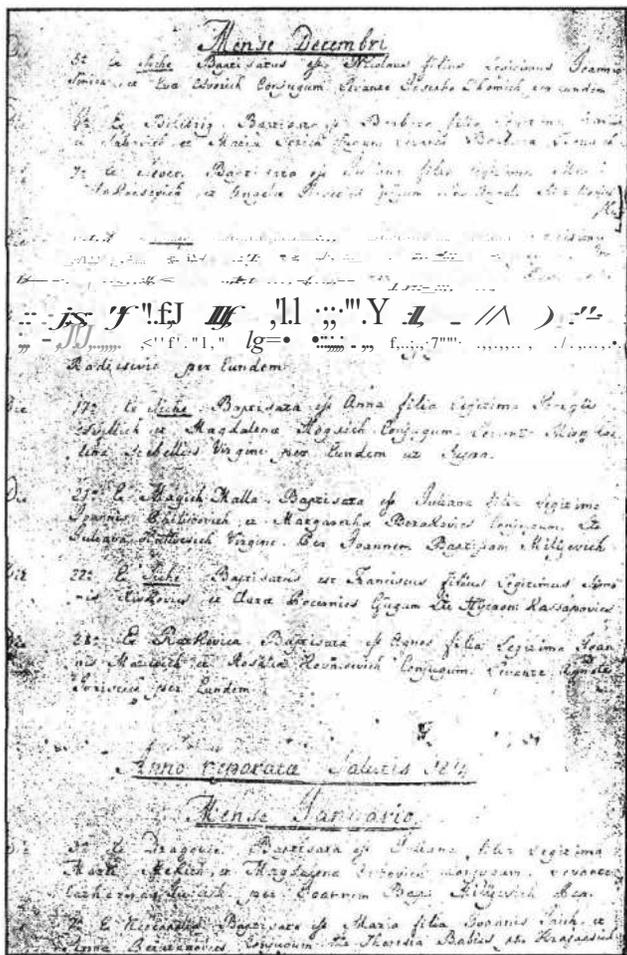

Tue genealogically relevant religious documents of Croatia, listed in descending order of sheer volume, are from Roman Catholic, Orthodox (also referred to as Greek, Serbian, and now Croatian Orthodox), Jewish, and Greek Catholic institutions⁵. These records comprise some of the most rewarding materials microfilmed by Ule Genealogical Society of Utah. Examination reveals Uleir contents to be similar to Ule vital records of other European nations: births (baptisms), marriages, marriage banns, deaths (burials), and occasionally confirmations, communion records, and *stati animarum*.

Latin Catholic (Greek and Roman) Documents

Roman and Greek Catholic church books are primarily composed in Latin and/or Serbo-Croatian. The earliest Catholic parish register filmed by the GSU dates to Ule 1460s, is in Glagolitic script and belongs to an as yet unidentified Dalmatian parish. Tue oldest identifiable records represent registration from Ule Adriatic coast (Banj 1587, Hvar 1516, Krk 1565, Rab 1569, Split 1597, Zadar 1569) and the former Austrian Küstenland (Bale 1538, Rovinj 1553).

Croatian Catholic birth records are easy to read and are written with a highly redundant vocabulary and a simple syntax. Tue example shown in Fig. 10 (opposite page) is reflective of birth records in general. At the top of the page, underlined, is listed Ule month of registration, *Mense Decembri*, "In the month [of] December." Eight baptisms were performed during Uleir period. Tue event of the 21st is typical of each: *Die 21. Ex Magica Malla. Baptistestuliana filia legitima Ioannis Philipovich, et Margaretha Berakovics conjugum. Ule Juliana Katicich virgine. Per Joannem Baptistam Milyevich*, "On day 21. From Magich Malla. Juliana, a legitimate daughter of Ule lawfully married Joannis Philipovich and Margaretila [nee] Berakovics, was baptized. Godparent was the unmarried Juliana Katicich. [Tue baptism was performed] by Djinnis Baptistia Milyevich."

Fig. 10 - Latin birth register from Nova Kapela, 1814

Latin marriage records are common to the Catholic religions. Fig. 11 is an example from the parish of Kutina for the 7th of February, 1807, and poignantly demonstrate that Croatian weddings are indeed family affairs.

- Matbias Kudlek marries Maria (widow of Georg) Kudlek
- Barbara (daughter of Matbias) Kudlek marries Joannes Gredyan
- Stephan Kudlek marries Agatha (dau. of Joannes) Martinich
- Barbara (widow of Joannes, mother of Agatha) Martinich marries Stephan Szmudy
- Blasius (son of Paul) Martinich marries Dorothea Mibacz
- Maria (daughter of Paul) Martinich marries Joseph (son of Lucas) Szmudy
- Emerius (son of Matbias) Szmudy marries Catbarina Poszavetrich
- Bartolomeus (son of Michael) Martinich marries Rosalia Jagust

The records are uniform in style and content. A transcription of the last entry in Fig. 11 reads: *Copulatus [est] Gregorius adolescens filius defuncti Stephani Mikoleta*

Sartor, cum delecta sibi sponsa Anastasia vidua defuncti Djinnis Baken. PP Michaelae Mallovich et Georgio Dorkanich, per Joannem Detanovich, Parochum Kutt. In English: "Gregory, the unwed son of the deceased Stephan Mikolet Sartor, was married to his personally chosen bride, Anastasia, the widow of the deceased Djinnis Boken, by the priest of Kutina, Joannis Detanovich. The witnesses were Michael Mallovich and Georg Dorkanich."

Fig. 11 - Weddings for an extended family in Kutina, 1807

Parish	Date	Event

Kutina	7 ^{to} Febr. 1807	Copulatus e[st] Gregorius adolescens filius defuncti Stephani Mikoleta, cum delecta sibi sponsa Anastasia vidua defuncti Djinnis Baken, per Joannem Detanovich Parochum Kutinensem.

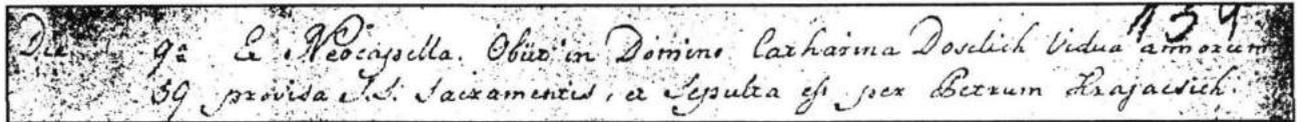

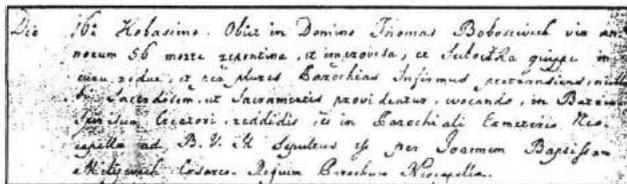

Fig. 12a - latin death record of Catharina Doschlich from Nova Kapela

Death records are equally simple, listing the deceased's place of residence, gender and age. Tue 9 October entry (fig. 12a) reads: *Die 9a Ex Neocapella. Obiit in Domine Catharina Doschlich vidua annorum 39 provisa S S Sacramentis, et sepulta est per Petrum Hrajacich.* In English: "On [October] 9th. From Nova Kapela. Catharina Doschlich, a widow 37 years old, died in the Lord, having received Last Rites she was buried by Petar Hrajacich."

Entries can sometimes offer more personal detail and display a dramatic or literary quality. Consider, for example, the death of 16 November (Fig. 12b): *Die 16 Ex Kobascino. Obit in Domino Thomas Bobiscivich vir annorum 56 morte repentina, et improvisa, ex Suboczka quippe in caru {sie} redux, et per plures Parochias injirmus pertransiens, nulli {u}bi Sacerdotem, ut Sacramentis provideatur, evocando, in Batzina Spirillum Creatori, reddidit, et in Parochiali Ccemeris Neocapellce ad B.{eatam} V.{irginem} M.{ariam} Sepullus est per Joannem Baptistam Milyevich Ccesareo. Regium Parochum Neocapellce.* "On the 16th. From Kobascino. Thomas Bobiscivich died in the Lord at age 56 from a death that was both sudden and unforeseen, so much so that he, while ill, was returned with care from Suboczka, passing through many towns where there was no priest, so that he might be given Last Rites. In Batzina, crying out, he yielded to the Spirit of the Creator and was buried in the parochial cemetery "Blessed Virgin Mary" of Nova Kapela by Djinnis Baptista Milyevich, senior priest of the Nova Kapela parish."

Fig. 12b - latin death record for Thomas Bobiscivich

Important key words and phrases in these Latin records are:

Baptisatus, -a est (feminine past perfect passive construction from *baptizo*) meaning "was baptised"

Copulatus est ... cum meaning "was married ... to"

Die (ablative singular from *dies*: day) meaning "on the day [of]"

Defuncti (genitive singular of *defunctus*, participle from the deponent *defungor*) meaning "of the deceased"

Legitimatus, -a meaning "legitimate"

Levante (abbr. *l.e.*, gerund or gerundive from *levo*: to raise).

Roman belief held new born children were raised from

the ground into life by the goddess *Levana*, hence the Latin meaning "midwife." Here, by extension from the act of drawing out an infant from a baptismal font. "god-parent"

Mense (ablative singular of *mensis*: month) meaning "in the month [of]"

Obiit (from *obeo*) meaning "(s)he died"

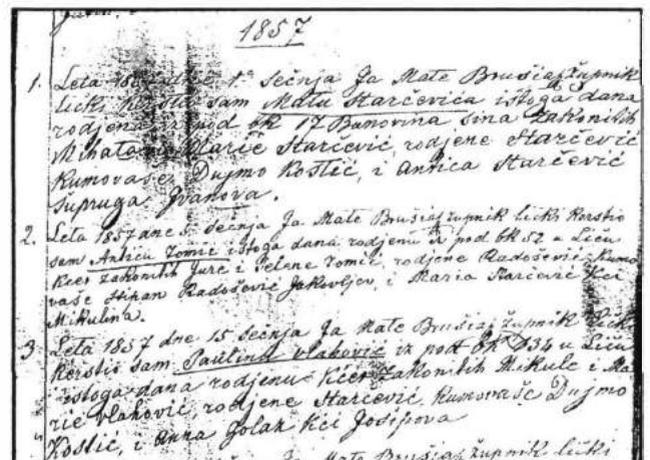

Patrinus, -a, pi. patrini (abbr. *P.* or *PP.*) meaning "patron, protector", and so in a marriage context, "witness"

Viduus, vidua meaning "widower, widow"

Croatian Catholic (Greek and Roman) DocUJlents

Birth records in Croatian are similar to their Latin counterparts. Figure 13 is an example from the parish of Lic. Entry 1 reads: *Leta 1857 dne Ja Secnja Ja Mate Brusiach iupnik licki kerstio sam Matu Starcevic istoga dana rodjena iz pod b{roja} k{ute} 17 Banovina sina zakonitih Mihata i Marie Starcevic, rodjene Starcevic. Kumovase Dujmo Kostic, i Antica Starcevic suprugava Ivanova.* In English: "On 1 January 1857, I Mate Brusiach, the priest of Lic, baptised Mate Starcevic, born on the same day at house number (book number?) 17, Banovina [of the Banat], a son of the lawfully married Mihata and Maria Starcevic nee Starcevic. God-parents were Dujmo Kostic and Antica Starcevic, spouse of Ivan."

Fig. 13 - Croatian birth records from Lic, 1857

Important key words and phrases in these Croatian records are:

Dne (adv.) meaning "on the date"

Kumovase (from *kumovati*: to sponsor, bc a god-parent)

Krst (Kerst) meaning "Christening"

Leta (old plural for *godina*) meaning "in the year"

Secnja (old spelling of *sijecanj*) meaning "January." The

other eleven months of the year, in calendrical order, are *veljaca, o tujak, travanj, svibanj, lipanj, kolovoz, rujan, listopad, studeni* and *prosinac*

Rodjen (Rođen) meaning "born"

Suprug -a meaning "spouse"

Zakonitih (gen. pi. of *zakonit*) meaning "lawful, legitimate"

By 1878 the majority of Catholic marriage and death registration was written in Croatian. Figures 14 and 15 illustrate these record types on printed forms. The documents, when read from left to right, outline the following information.

Marriages:

Broj tekuci, entry number

Godina, mjesec, dan, kad su vjencani, year, month, and day when married

Ime, prezime, stalis njihov, personal name, surname, and profession (e.g. *poljodjelac*, farmer)

Gdje su se rodili, place of birth

Gdje stanuju, place of residence

Vjerajim, religion

Dobajim, age

Jesu li mladenci ili udovci, single or widowed

Ime, prezime, vjera, stalis njihovih roditeljah, personal name, religion, surname, and profession of parents

Ime, prezime, vjera, stalis njihovih svejedokah, personal name, religion, surname, and profession of in-laws

Ime, prezime, slutba onoga, kojijihje vjencao, personal name, surname, and profession of marrying authority (e.g. *tupnik*, priest)

Jesu li ozvani? Je li Jim se oprostio koji oziv ili koja zaprieka, were there bans? Were they approved or was there an hinderance?

Opazke, observations and comments

Deaths:

Broj tekuci, entry number

Godina, mjesec, dan, kadje umro, year, month, and day of death

Ime, prezime, stalis njegov, personal name, surname, and profession (of the deceased)

Ime, prezime, stalis njegovih roditeljah ili tene, name, surname, and profession of parents or wife

Gdjeje rodjen, place of birth

Gdjeje stanovao, place of residence

Verja mu, religion

Dobamu, age

Od cegaje bolovilo ili umre, cause of death

Je li primio svete sakramente umiruc ih? Was the deceased given Last Rites?

Gdje i kadje pokopan? Place and date of the burial

Ime, prezime i sluiba onoga, koji ga je pokopao, personal name, surname, and profession of person performing the burial

Opazke, observations or comments

Many Catholic records from Croatia are written in Glagolitic script. Glagolitic records are identical in content to other pre-printed Catholic parish registration. The complexity of the epigraphy, however, makes a detailed analysis impossible here. Figure 16 supplies a key to the Glagolitic alphabet. The columns, from left to right, provide the lower-case form of the Glagolitic letter, the upper-case

Fig. 16 - The Glagolitic alphabet

Fig. 17 - Glagolitic parish register

form, the corresponding numerical value, the Cyrillic equivalent, the numerical value of the Cyrillic equivalent, the Latin transliteration, and the pronunciation. This numerical value of the characters is important in order to read dates, for the Glagolitic script, like Greek and Latin before it, used letters to also represent numbers. Figure 17 provides an example of a Glagolitic parish register.

Orthodox

The Eastern rite records of Croatia are uniformly written in Serbian (i.e. Serbo-Croatian with a Cyrillic script). Figure 18 (opposite) is an example. Document content is similar to Croatian Catholic records. The beginning researcher, with some practice, will be able to read Orthodox parish registration by equating Serbian words to Croatian counterparts using the following transliteration table.

A, a=A, a	J, j=J, j	C, c=S, s
li, 6=8, b	K, K=K, k	T, t=T, t
B, s=V, v	∩l, ∩l=L, l	∩, fi=C, C
∩, r=G, g	∩h, ∩l=Lj, lj	Y, y=∩l, u
∩∩, ∩∩=D, d	M, M=M, m	∩, ∩=F, f
n, ∩=D, d	H, t=N, n	X, x=H, h
E, e=E, e	∩h, ∩=Nj, nj	U, u=C, c
∩k, ∩-∩Z, Z	O, o=O, o	∩f, q=C, C
3, J=Z, z	∩, n=P, p	U, u=Dz, dz
H, n=I, i	P, p=R, r	∩∩, m=S, s

Jewish

Jewish ecclesiastical records date from the latter 13th to the end of the 19th century. Several registers, created under the aegis of the Austrian military, continue through the conclusion of World War I. Excluding military records, which are exclusively in German, the vital documentation of Croatian Jewry is written in Croatian, German, or Hungarian with marginal translations into Hebrew and Yiddish. The one routine addition to the standard birth, marriage and death record type is the inclusion of the event date by the reckoning of the Hebrew calendar. At present, fifteen Jewish congregations are in the FI-IL collection: Cakovec (1782-1895), Darda (1854-1895), Drnje (1800-1910), Karlovac (1853-1880), Koprivnica (1850-1898), Ludbreg (1851-1911), Orahovica (1779-1939), Osijek (1780-1913), Pakrac (1866-1910), Slatina (1858-1912), Slavenska Pozega (1821-1941), Varazdin (1879-1920), Virovitica (1856-1881), Vukovar (1850-1931) and Zagreb (1858-1904).

Working Aids

The challenges of Croatian genealogical research are numerous and range from language issues, document identification, through problems associated with historical geography. At times, all but the most savvy academic must seek assistance from scholarly publications. The following working aids are useful for providing information that may answer the many linguistic and locality questions that both the beginning and advanced researcher must address.

Bogadek, F. A. *Cassell's New English-Croatian and Croatian-English Dictionary*. 3rd ed. New York: Macmillan, 1985.

Lewis, Charlton T. and Charles Short. *A Latin Dictionary: Founded on Andrews' Edition of Freund's Latin Dictionary*. Oxford: Clarendon Press, 1879.

Magner, Thomas F. *Introduction to the Croatian and Serbian Language*. Rev. ed. University Park: Pennsylvania State University Press, 1991.

Orszagh, Laszlo. *Magyar-angol kezesbftar*. Budapest: Akademiai Kiado, 1971.

Terrell, Peter. *Pons Collins Deutsch-Englisch, Englisch-Deutsch*. Stuttgart: Klett, 1980.

Church Directories

Opci Sematizam Katolicke crkve v Jugoslaviji: Cerkev u Jugoslaviji. 2nd ed. Zagreb: Biskupska Konferencija Jugoslavije, 1974.

Dictionaries and Grammar

Benson, Morton and Biljana Sljivi -Simsi. *Srpskohrvatsko-Engleski Recnik*. Beograd: Prosveta, 1974.

Gazetteers

A Magyar Szent Korona Orszádgainak Helysegnevtára.
Budapest: Pesti Könyvnyomda Rt., 1913. p. 1341-1712 (*Horvdt-Szlavonorszdgok*).

Dalmatien, vol. 14 of *Gemeindelexikon der im Reichsrathe vertretenen Königreiche und Länder*. Viena: Verlag der k.k. Hof- und Staatsdruckerei, 1908.

Imenik Naseljenih Mesta u Socialistickoj Federativnoj Republici Jugoslaviji. Beograd: Novinsko-izdavacka ustanova Sluzbeni list SFRJ, 1985.

Raffelsperger, Franz. *Allgemeines geographisch-statistisches Lexikon aller österreichischen Staaten*. Vienna: Verlag der **K.K.A.P** Typographischen Kunstanstalt, 1845-1853.

United States. Board on Geographic Names. *Yugoslavia: Official Standard Names Approved by the U.S. Board on Geographic Names*. Washington, D.C.: U.S. Office of Geography, 1961.

General History

Eterovich, Francis H. and Christopher Spalatin. *Croatia: Land, People, Culture*. Toronto: University of Toronto Press, 1969-1970.

Guldescu, Stanko. *History of Medieval Croatia*. The Hague: Mouton, 1964.

Mans

Generalkarte von Mitteleuropa. Vienna: Bundesamt für Eich- und Vermessungswesen, 1889-1967.

Jugoslavija Auto Atlas. Zagreb: Jugoslavenski Leksikografski Zavod, 1973.

United States. Army Map Service. *Yugoslavia 1:50,000*. Washington, D.C.: U.S. Army Corp of Engineers, 1958-1969. (Army Map Service; M709).

Conclusion

The genealogical records of Croatia pose significant research opportunities for both success and frustration. The intent of this *Beginner's Guide* was to familiarize the genealogist, mainly by illustrated example, with the record types common to the nation of Croatia. A discussion of the research process itself, for several reasons, has been

avoided. Paramount among these considerations is the upcoming publication by FEEFHS of a *Beginner's Guide* to genealogy. This paper will discuss in detail basic research principles common to East and Central European genealogy. To further assist the reader with Croatian research, I have provided two supplementary documents: Appendix A, a list of all Roman and Greek Catholic parishes in Croatia, and Appendix B, a summary of all Croatian localities microfilmed by the FHL through 1 May 1999. The users of this latter document can obtain microfilm numbers by consulting the Family History Library Catalog at <http://www.familysearch.org>.

⁴ Steven W. Blodgett, "Great-Grandfather was in the Imperial Cavalry: Using Austrian Military Records as an Aid to Writing Family History," in *Continental European Family and Local History*, vol. 7 of *World Conference on Records: Preserving our Heritage* (Salt Lake City: Corporation of the President of the Church of Jesus Christ of Latter-day Saints, 1980), series no. 504, p. 1-2.

⁵ The term Greek Catholic has two meanings in Yugoslavian research. First, it can refer to an Orthodox believer who is not a member of the state religion; second, to an Uniat, i.e. one who practices the Eastern rite but recognizes the ruling authority of the Bishop of Rome. The researcher can readily make the distinction between Eastern rite Catholic and Orthodox parishes by consulting: Franz Raffelsperger, *Allgemeines geographisch-statistisches Lexikon aller österreichischen Staaten*, 9 vols. (Vienna: Verlag der **K.K.A.P** Typographischen Kunstanstalt, 1845-1853). An example of this from vol. 4, p. 683: "Medare, Slavonien ... Do.f von 63 Häus. u. 328 Einw., mit einer griech. nicht unirten Pfarre," translates as "Medare, Slavonia ... a village of 63 houses and 328 residents, with a Greek [rite], non Uniat, parish."

Appendix A: Croatian Microfilming List

The following is a list of all of the localities in Croatia with church records or other vital records of (births, marriages, and deaths) that have been microfilmed by the Genealogical Society of Utah. The name of each locality appears in bold, followed by the denomination in italics, and dates in parentheses. Localities with multiple denominations are listed more than once. The capital B, M, or D, or any combination thereof, indicates that births, marriages, or deaths, or a combinations of these, is missing. The absence of these letters indicates that there are birth, marriage and death records available within the span years, but not necessarily that all three are available for all of the years. Most records were microfilmed in Croatia. Where records have been microfilmed elsewhere, the country where the filming took place is given.

Appendix B: Croatian Catholic Parish List

This list includes most, if not all, of the pre-World War I Catholic parishes in Croatia. Following the locality of each parish is the year that it was founded, in italics. The name of the diocese that the parish belongs to follows, with the name of the deanery after that. If the parish also belonged to an archdeanery, the name of the archdeanery is given in parentheses.

Aleksinica 1696 - Rijeko-Senjska, Gospicki

Zverinac 1690 - Zadarska, Bozavski

Officers index (*Kartei für Musterlisten und Standestabellen*), 1740-1820, on 29 rolls of film.

This alphabetical file includes names and regimental unit numbers for each officer shown in the muster lists.

Service records (*Dienstbeschreibungen und Qualifikationslisten*), 1823-1918, on 3,408 rolls of film.

These are filed alphabetically and supplement the muster and background books with more complete information on the service of each officer, official or staff member. These records give exact birth dates and special duties and other events noted. Some information about parentage may be given as well as the units in which served.

Other records

Muster rolls and formation tables (*Musterlisten und Standestabellen*), 1740-1820, on 5,104 rolls of film.

These are filed and cataloged by the name of each regiment or unit. Most units have individual indexes, but there is still no index for all enlisted soldiers. Information for each soldier includes name, age, birthplace, children's names and birth dates (after 1770), religion, occupation and marital status.

Background and formation lists (*Grundbücher und Stellunglisten*), 1820-1869, on 2,884 rolls of film.

These are arranged by the name of the regiment or unit. Each unit has its own index and is arranged by date of mustering out. Information for each soldier includes name, age, birthplace, children's names and birth dates, religion, occupation and marital status.

Military church records (*Militärkirchenbücher*), 1654-1922, on 551 rolls of film.

Church records were kept for each military unit, hospital, and garrison in the Austrian army. Many of these records have been microfilmed. They are cataloged under the name of the unit and a location if applicable. These records contain mostly death records, but a surprising number of births and marriages were recorded also. Only volumes that did not extend past 1886 were filmed.

Background sheets for soldiers from states of the modern republic of Austria are currently being filmed. So far, records from Vienna (*Wien*), Lower Austria (*Niederösterreich*), and about half of Upper Austria (*Oberösterreich*) have been received.

Grundbuchblätter Microfilm List

The following is a list of the microfilm numbers for the collection of background sheets (*Grundbuchblätter Diverse*), described above. The beginning surname on each roll of microfilm is shown with the film number. The same surname is usually found also at the end of the previous roll of film.

Part I, 452 rolls, A-Z:

Bohemian Ancestors Emigrate to Eastern Galicia, Failing to Notify Descendants A Case Study in Czech Research

© by James Pelikan and Duncan 8. Gardiner, PhD, CG, AG

Introduction

This ancestry search began in Cleveland and proceeded to Solivar in eastern Slovakia, Stavnoe in Subcarpathian Rus', and Klimiec parish in eastern Galicia, then back to the Gennan-speaking area of western Bohemia. L'viv and Warsaw archives supplied just enough records of the family in Galicia to keep the investigation alive. By good fortune, the Klimiec parish registers, which hold the key information, are available in the LDS Family History Library collection of Polish archive films. By a further stroke of good fortune, the pastor of Klimiec parish recorded the names of the Bohemian towns of origin of those he married and those whose children he baptized. Research uncovered records in the Czech (Bohemian) parish registers going back into the 1700s, with further research a promising possibility. The following story describes how that search unfolded.

Finding the right Annaberg

While Jim Pelikan has always been curious about his ancestors, it wasn't until 1994 that his family research began. In the fall of 1993, Jim was preparing for his first trip to Europe. Having sparse information about ancestral villages, Jim's goal for the trip was simply to experience the places mentioned in family lore. For the Vadas family, on his mother's side, oral tradition alone gave the name of a single village, Solivar, near Presov, in eastern Slovakia. Grandma Vadas' husband's family had lived closer to Kosice and the present day border between the Slovak Republic and Hungary.

On Jim's father's side, the Pelikan tradition was that the family had emigrated from Annaberg, Austria. As a result of Jim's preparatory research, a second village came to light: the village of Skole, Poland, where his great grandfather was said to have worked. On a map in the library, Jim found Skole in the Carpathian Mountains in western Ukraine. His trip was planned to include these places. He flew to Poland and went by train from Kraków to L'viv in Western Ukraine to visit Skole. Again by train he crossed the Carpathian Mountains on his way to Kosice, Slovakia, where he stopped to see Solivar. His third train trip crossed northern Slovakia to Austria, in order to visit Annaberg, near Linz. After a final train ride from Vienna to Prague, where Jim joined his wife, they flew back to Cleveland, Ohio. Having seen places where his ancestors had and as he later learned in one case, had not lived, he was ready to begin his research. That was the Spring of 1994, and the time when he contacted me to do the initial Vadas research in the Presov archives. Subsequently, he began ordering microfilms at the local LDS Family History Center, and together we followed up on various branches of his ancestors.

Eighteen months later, we were making progress on the Vadas line, but continued to hit a wall with the Pelikan

research. LDS parish records from Annaberg produced no sign of the family name, and Jim was beginning to write other Annaberg parishes in Austria, when new information arrived that changed our entire direction. Jim received a photocopy from the National Archives of the 1907 passenger arrival list for Alois Pelikan. That document listed Zawadka and Myta as the place of residence for Alois and his family. It was while we were searching for these places on a detailed map of the region around Skole that Jim pointed further down the map to the village of Annaberg. It was Annaberg, in Galicia, just 26 km (15 miles) southwest of Skole and 6 miles north of the mountain crest, which was at that time the border between Galicia (Austria) and Subcarpathian Rus' (Hungary), two provinces of the Austro-Hungarian Empire. The region is now part of Ukraine.

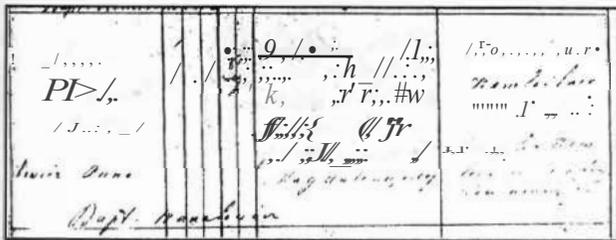

Now that we had located what we hoped was the right Annaberg, the question was how to obtain records from that area. My impression was that Ukraine, aside from a few

Map of Annaberg, Galicia, and vicinity
(Towns mentioned in this case study are circled.)

Border between Galicia (Austria) and
Subcarpathian Rus' (Hungary)

Birth record of Maria Elisabeth Pelikan

microfilms and several cooperative archive personnel, was one of the black holes of genealogy. Jim began studying materials provided by genealogical societies like the German Galician Descendants and writing letters to archives and church offices. It took over a year to go through a number of steps that began to establish documentation of the family's presence in the area of Skole. One record came from the L'viv archive for the birth in Skole of Alois Pelikan's sister, Maria. A Warsaw archive found several records from the parish of Felizienthal, Galicia, which included the village of Annaberg. Included in the records they found was the marriage record of Alois Pelikan and Katherine Hoffman in 1900 (showing the groom from Stavna (now Stavnoe), Ung county). They also found the

record of Katherine's April 1879 birth in Annaberg, a sibling's birth record, the marriage record of her parents, John Hoffinan and Veronica Ekel (on 4 February 1874 in Felizienthal), and records of the births of three children of Katherine & Alois.¹

The Bohemian connection

Then there was another long stretch of months with no promising leads, during which I suggested Jim join the East European Genealogical Society, which has an excellent newsletter, the *East European Genealogist*, edited by Brian Lenius. (Jim was already a long-standing member of FEEFHS.) He later wrote directly to Lenius for advice. Brian suggested he look at the microfilmed registers of the Klimiec parish, in Poland (now Ukraine), part of the LOS collection (film 00766224). Even though the Klimiec film covered a fairly narrow range of records (only from 1843 to 1862), Jim ordered it and hoped. This time the hope was justified as Jim found records from Annaberg for his paternal grandmother, Katherine Hoffman, and some other relatives. Katherine's mother, Jim learned, was born in Annaberg on 13 April 1855 and her father, John, was born in Felizienthal on 28 September 1845. When Jim brought the records to me for translation there was a moment of electrifying revelation. As I translated from Latin, the very first record clearly indicated that the groom was "*agricola ex Carlsdorf. . . natus in Petlernbrand, Districtus Tachoviensis, Circuli Egeriensis in Bohemia*" that is a "farmer of Carlsdorf, born in Petlernbrand, Tachov county, Eger region, in Bohemia." Other birth records showed Katherine's paternal grandparents (Georg Anton Hoffinan and Katherine Seitz) were born in Purschau, Bohemia.

Marriage record from Klimiec parish, Galicia, showing the groom born in Petlernbrand, Tachov county, Bohemia

The War w city civil records office sent a total of six records and charged \$280.00 for them. One wonders how a civil records office in Poland can issue apparently legal vital records for events which occurred not just in another jurisdiction, but in another country together. The fact that the certificates earned the Polish state almost three hundred dollars may have something to do with it.

Map of the Galician and Bohemian homelands of Ekel, Hoffman, and Pelikan ancestors

Also in the Klimiec parish register, we found the marriage record of Kalheri.ne's maternal grandpare.nts (Konrad Ekel and Margaret Krauss) on 20 June 1852 in Annaberg. Tbat marriage record gives their Bohemia.n birth villages as Eisendorf for the groom and Petlambra.nd for the bride. Two more challe.nges existed before celebrating the finding of Jim's Galizien a.ncestors' home in Bohemia: the identification of the current Czech town names, and any record from the Bohemia.n parish registers which would prove that the family originated in the specific locality named in the Klimiec parish records. That would allow us to take the a.ncestry farther back in time using the Czech parish registers.

We consulted Ernst Pfohl's gazetteer, *Ortslexikon Sudetenland*, to find the modern Czech names for the towns in Bobemia. Purschau is now Porejov, a town near Tachov, west of Pizen. Petlambra.nd, located about 5 miles south of Tachov, is now called Zebraky. Staab is now the town of Stod in Stribro county, west of Pizen. The town of Eisendorf is shown in Pfohl under the Germa.n name only. It was located in Bischofteinitz (Horsovsky Tyn) county near a place called Hostau which turns out to be Hostoun in Czech. We looked up Eisendorf in Antonin Profous', *Mistnijmena v Cechach* (Place names in Bohemia). Profous gives only the Germa.n name with no Czech equivalent, but we were able to use his book to locate the town 13.5 km west-northwest of Hostoun, and 1.5 km from the border with Germa.ny. The map shows a town at that very location called Zelezna, the Czech word for 'iron'. Given that Eisendorf means 'iron town' in Germa.n, it all bega.n to fit together nicely.

In three years the search for the origins of the Pelikan family had moved from practically zero information to quite a bit on the Hoffman line, adding two whole generations and ma.ny a.ncestors' names with the possibility of taking the ancestries back much farther using Czech parish registers.

The history of the family was becoming. The ancestors of Katherine Hoffman left the Tachov area of Bohemia around 1835, joumeyng east to find opportunity in Galicia on the north-east slopes of the Carpathian Mountains. In 1900 Kate Hoffman married Alois Pelikan in the Galician village where her family had lived for 65 years, and by 1910 Ule family had emigrated to the United States, and was beginning its life in Pennsylv.nia.

Brian Lenius provided Jim with copies of several pages from *Heimat Galizien* (Galicia Homeland), which contains articles about various towns to which Germans migrated in the 1780s (under Joseph II) through the early 1800s. One article, written by Johann Bill, called "Die Deutsche Sprachinsel im Felizienthal," says that there were over 2,000 Germa.ns living in the group of villages around Felizienthal (including Annaberg and Karlsdorf). These villages were settled in 1835 and 1838 by Catlolic Bohemian Gennans from the areas surrounding Prachatice (southern Bohemia), Plzen, and Tachov (western Bohemia). This article confirmed what we had found in the Klimiec parish registers. Tue Hoffman family's move to Galicia was part of a larger pattern of German migration from Bohemia to the l---elizienthal region of Galizien.

Research continues in Czech records

The next step was to consult the relevant parish registers in the Czech state regional archive at Pizen, which covers the western portion of the Czech Republic. Tachov county is situated on the border with Germany, directly west of Pizen. From the Czech archives, this new picture of family ancestors in Bohemia began to take shape. A record was found for the marriage of Katherine Hoffman's paternal grandpare.nts, Georg Anton Hoffman & Katherine Seitz in Purschau, Bohemia, on 18 September 1832. A few years later they would leave Purschau and the Hoffmann family home (house #41) for Galicia. This house is where Georg

Anton was born on 1 January 1811 and where his father, John, was living in 1809, when he and Georg Anton's mother (Elizabetb) were married. This was a second marriage for both John and Elizabetb. The 1809 marriage record describes the groom as a 35-year old widower who was a master Lailor in Purschau. His first wife, Anna Peiml, died in October 1809, leaving three children under the age of three with John. John and his second wife, Elizabelh, had five children between 1811 and 1821, the first being Georg Anton.

The parish of Purschau included three villages (Purschau, Petlarn, and Petlambrand), in which Hoffman and five related surnames were found. These surnames are Seitz, Guntner, Krauss, Kurz, and Degman. Prior to World War II, the Pizen archive listed records for this Purschau parish extending back to 1644. Today the archive only has possession of records back to 1784. We don't know what happened to the earlier records. One possibility is that after the War, when the Bohemian Germans were forced to leave, they took the records with them. This area of the Czech Republic had

been a predominately German area since the early Middle Ages. World War II resulted in the removal of Bohemian Germans and the destruction of their villages. Today the village of Purschau (Porejov) is described as only a few stones in an otherwise wild countryside.

Thus far, we have found in Bohemia only three generations of data for the Hoffmans in Purschau: the marriage in 1832 of Georg Anton and Katerine before they emigrated to Galicia; records of their parents' generation, such as the 1809 marriage of Georg's parents and the 1786 birth of his mother Elizabetb; and some information about the previous generation, such as the death records of Georg's grandparents in 1800 and 1807. Sudeten German organizations may have information about the missing records of Purschau parish.

Map of the vicinity of Tachov, Bohemia, near the German border
(Towns mentioned in this case study are circled.)

Ober Hoffman records from Pizen include information on both the first and second marriage of John Hoffman. The records for his first wife, Anna Peiml (born ca. 1780-1808), include the birth of their children as well as her death in 1808, but not her birth or marriage record. What exists points to her being from the Tachov area (village of Junischau), most likely from a parish northeast of Purschau, maybe Stare Sedlist (records begin in 1629) or Lesna (records begin in 1720).

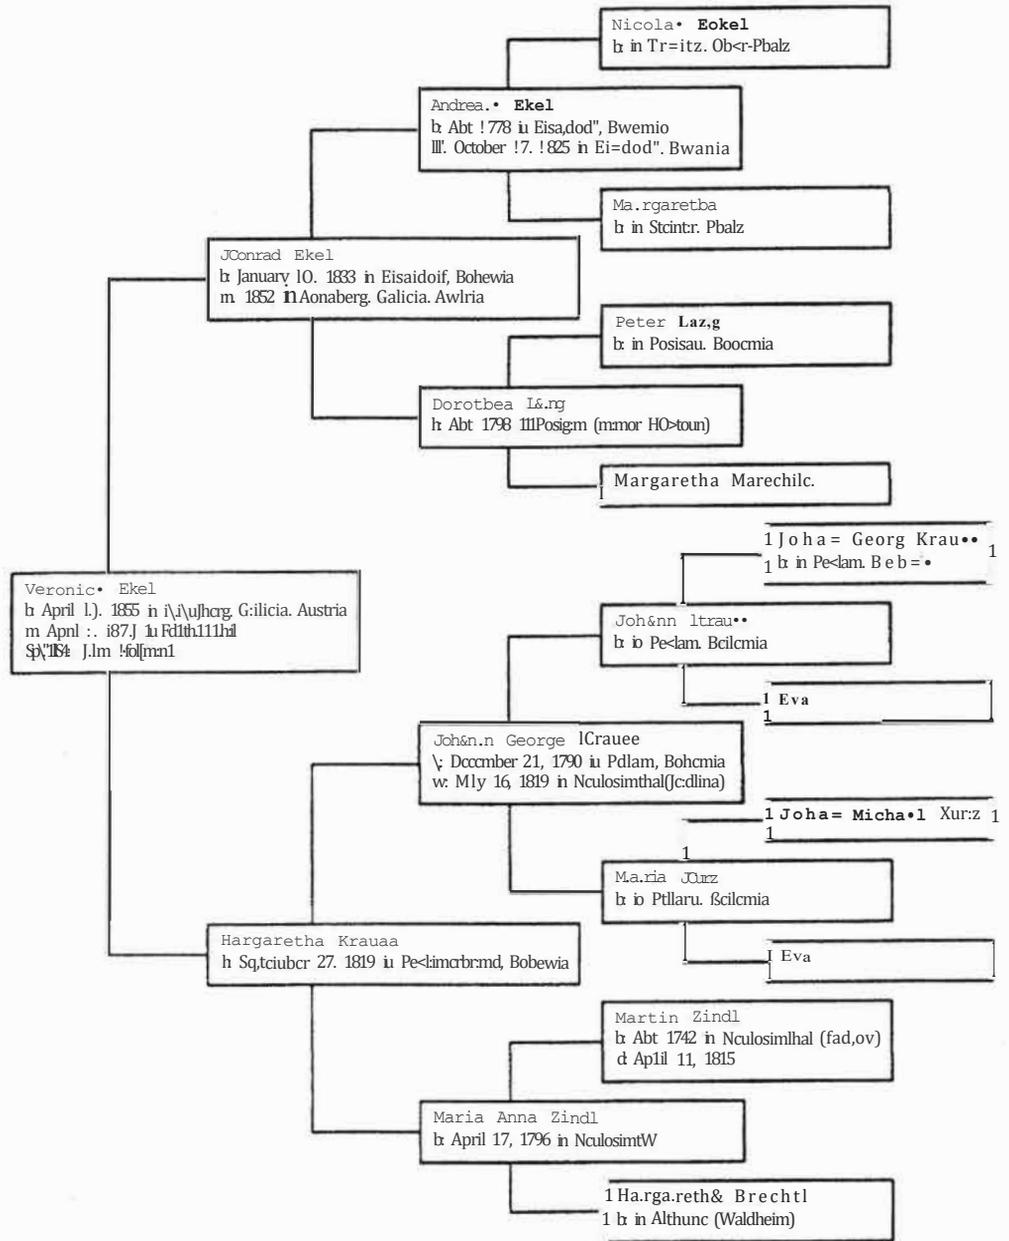

John Hoffman's second wife, Elisabeth, the widow of John Weis, a deceased Purschau tailor, was 23 when she married John. Elizabetb was born in 1786 in Ulliersreith (now Oldřichov), near Tachov, as were her parents John Zwerenz and Marie Wetting, both of whom died in 1819.

Ekel Ancestry

In addition to Katherine Hoffman's paternal grandparents, the Pizen archive has records of her maternal grandparents, Konrad Ekel and Margaretha Krauss. We discovered that Margarethe was born in Petlambrand on 27 September 1829. Her father, George Krauss, was a bricklayer from Petlambrand. Her mother, Maria Anna Zindl was born on 27 April 1796 in Neulosimthal (now Jedlina), which is directly west of Purschau, and on the border with Germany. George and Maria were married in Neulosimthal on 16 May 1819. Marie's father, a day laborer was born there as well in about 1742, and died there on 11 April 1815. Margaretha would have been about six years old when the family took the journey from Bohemia to Galicia.

Margaretha's husband, Konrad, was born 20 January 1833 in Eisendorf, Bohemia, to Andreas Ekel and Dorothea Lang. Dorothea and Andreas were married 17 October in Eisendorf. Dorothea was born about 1798 in Pösigkau (now Bezdekov) in the parish of Dubec, near Hostouii. Andreas, like his son Konrad, was born in Eisendorf in about 1778, but his parents, Nicolas Ekei and Margaretha, came from Ober-Pfalz in neighboring Bavaria.

All the records found in the Pizen archive for this research were written in German. With the exception of the two villages from Ober-Pfalz which have not yet been traced, all the villages are in the formerly German speaking areas of western Bohemia, part of the Sudetenland. Two parishes, Eisendorf and Dubec were part of Hostouii manor, and the remaining were in parishes within Tachov manor, including Tachov and Purschau parishes.²

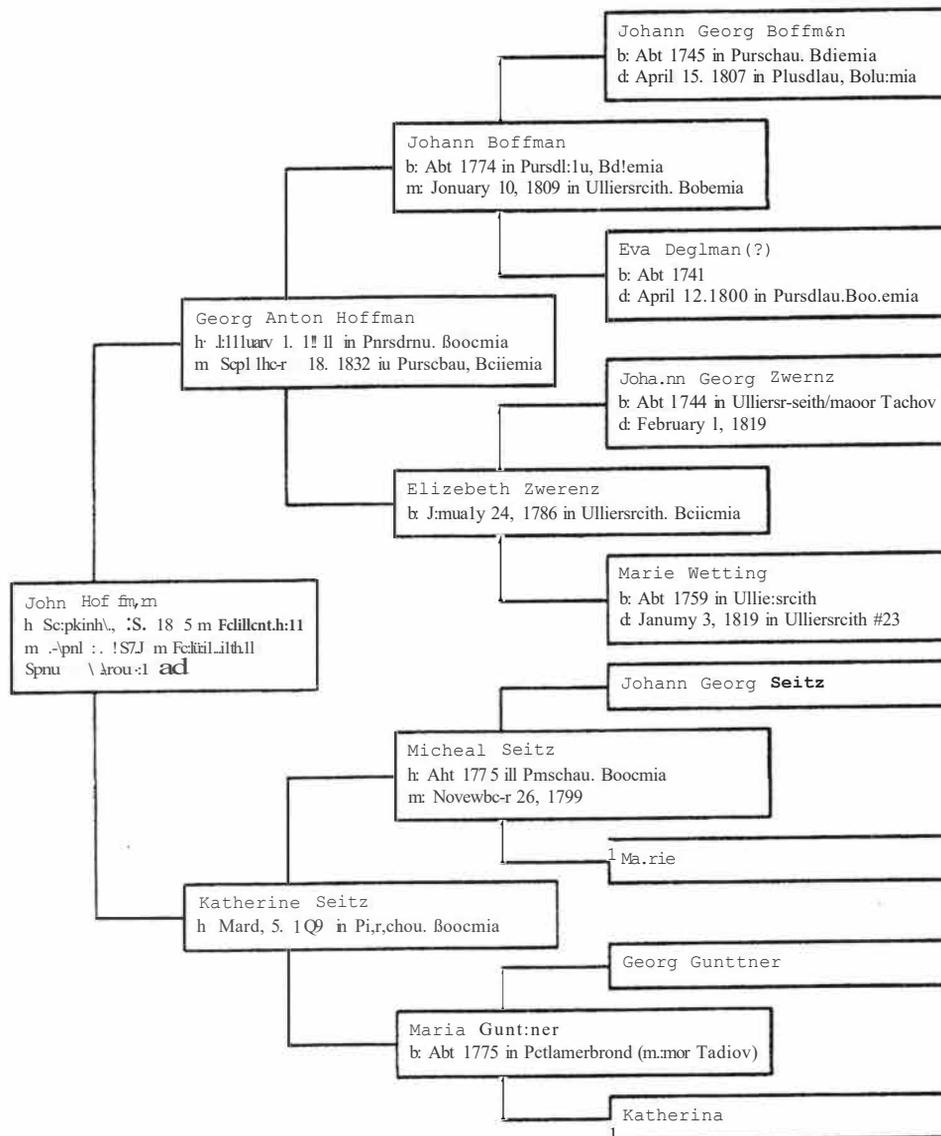

Ancestors of Veronika Ekel, mother of Katherine Hoffmann

Pelikan Line

For the Pelikan line in this family we are still wondering how we will find the 1879 birth record for Jim's grandfather in the parish of Nagy Berezna (now Velikiy Bereznyi, Ukraine), which we think was part of the Diocese of Satu Mare, Hungary (Subcarpathian Rus'). The village of Stavnoe, near Nagy Berezna, was in Ungvar county, Hungary, in 1879. In 1921 the population of Stavnoe was largely Ruthenian. We have no leads about German colonists in that area or how the parents of Alois got there nor why they moved a few years later across the mountains to Skole, Galicia.

² *Tachov manor, Hostoun manor:* The term 'manor' refers to the feudal dominion. Serfdom, the last remnants of the feudal system, was abolished in 1848 throughout Austria-Hungary.

Ancestors of John Hoffmann, Father of Katherine Hoffmann

As for the Pelikan surname, it is a venerable central European name, recorded very early in Bohemia and as early as 1260 in Speyer, Germany. Moldavov's Czech surname book (*Naše příjmení*) attributes its origin to the house sign, where the picture of a pelican feeding its young with its own beak was an early symbol of Christ.

According to Brian Lenius, many of the Roman Catholic parish registers from this area made their way to Poland after World War II and are in the archive at Rzeszów, Poland. During the early 1970s, these registers were filmed by the LDS Family History Library and so they are now available to us. These registers tell the precise towns in the Czech lands from which these settlers came. In looking at the registers myself, I saw other records identifying the towns of Albrechtschlag (=Albrechtovice, Prachatice county), Schreinetschlag (=Skhnefov, in Prachatice county), Neuhaus (probably Neuhäusel, now Nove Domky, Tachov county), Kuschwallz (probably Kravany in Spis county, Slovakia). One of the entries gave Bavaria as the

place of origin. A list of the residents of the small village of Schreinetschlag is in the *Soupis poddanych podle vby* of 1651, but none of the Pelikan family surnames appear in the listing.

Summary

Jim's search began within the boundaries of present-day Austria. It was with great resistance that Jim followed the data and let go of the family lore about Annaberg, Austria. A passenger arrival list and a detailed map helped us locate the village of Annaberg, Galicia. Finding the birth records of both Alois Pelikan and Katherine Hoffmann proved that we had finally located the right place. Although Annaberg is now in Ukraine, where finding records can be a great challenge, we were able to obtain the documents from Polish archives and the Family History Library. Now that we have discovered the Bohemian origin of Jim's Hoffman and Ekel ancestors, the search continues in the Czech Republic and soon in Germany also.

Macedonia Genealogy

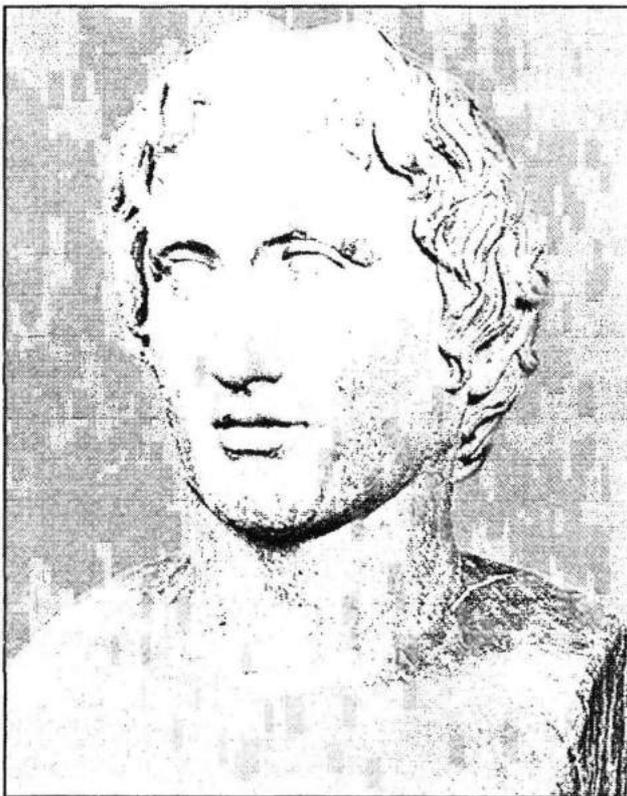

© by Kahlile B. Mehr, MLS, AG

Genealogy, not a common area of research during the Communist era, is as new to Macedonia as independence. As in many former Communist nations, archives long closed to all but official inquires, are now open to individuals wishing to investigate family history. The following is a brief history of Macedonia and a preliminary assessment of its genealogical sources.

History

Macedonia origins are traced to the 6th century B.C. The kingdom of Macedon rose to ancient glory under Alexander the Great who subjected Greece and the Persian Empire to his rule in the 3rd century B.C. The Macedon kingdom occupied most of the mountainous region north of Greece between the Adriatic and Aegean seas. It became a province of the Roman Empire in the 2nd century B.C. During the 6th and 7th centuries A.D., Slavic peoples moved into Macedonia from the north.

Alexander the Great

Copyright The Archive of Macedonia 1998

After the fall of Constantinople in 1453, the region was subjected to Ottoman rule and did not emerge from their control until the 20th century. During most of that period Macedonia was divided between the three Ottoman provinces (*vilayets*) of Salonika, Monastir, and Skopje.

In Ottoman Macedonia, Turks constituted the upper classes while the non-Muslim population, called *rayah* (flock), were relegated to the lower classes. Non-Turkic Macedonians could not possess or carry arms, paid higher taxes, and were required to provide soldiers for the sultan's army.

Only a small percentage of Macedonians ever converted to Islam. Christian clergy were allowed to regulate church activities, and exercised authority over revenues and civil relations between Christians. An Orthodox archbishopric existed in Ohrid between 1000-1767. Ottoman authorities abolished it in an effort to eliminate national churches within the empire. Ecclesiastical control of the area was transferred to the Orthodox patriarch in Constantinople. This was reversed in 1870 with the establishment of the Bulgarian exarchate. In 1958, over two hundred years after its initial dissolution, an independent Macedonian Orthodox Church was established in Ohrid.

Macedonian aspirations for autonomy led to the formation of the Macedonian Revolutionary Organization (MRO) in 1893. The MRO fomented the St. Elijah's Day (Ilinden) uprising in 1903. This was a large-scale demonstration against Ottoman rule that was brutally crushed. Ottoman hegemony over its European possessions collapsed during the Balkan wars (1912-1913), and historic Macedonia was divided between Serbia and Greece. Only a small piece remained in Bulgaria. These different regions are referred to as Aegean Macedonia (Greece), Vardar Macedonia (Serbia), and Pirin Macedonia (Bulgaria).

Vardar Macedonia was a battlefield during WWI. Over 1,200,000 soldiers were in the region. The warfare reduced cities to ruins, destroyed the infrastructure, and killed a huge

percentage of the civilian population. Survivors were included in the Yugoslav kingdom, formed in 1918. Following the war, Serbs pursued a program of assimilation that forbade the Macedonian language. Serbo-Croatian was taught in schools and was standard in all cultural, governmental and commercial spheres. Macedonians could not own property outside their county of residence. The Serbian population colonized large tracts of arable land. After WWII the new Communist regime established a Macedonia state within Yugoslavia and allowed Macedonian as the official language.

Before WWII, Vardar Macedonia was the most undeveloped area of Europe. After the war, the Communist regime focused on industrializing the primarily rural economy. This created a pattern of urban migration that resulted in massive unemployment and housing shortages.

The Communist period lasted from 1946-1991. When Yugoslavia dissolved by civil war, Macedonia emerged as a newly independent nation. On September 8, 1991, Macedonians voted overwhelmingly for independence. Macedonia received general international recognition and was admitted into the United Nations in 1993.

Greece objected to the name adopted by the new nation, which was considered part of Greek heritage. Another point of contention was Macedonia's use of the sixteen-point Star of Vergina (an emblem associated with Alexander the Great). Greece worried that a Macedonian state might make irredentist claims on historic Macedonian territory now in Greece. Because of these concerns, Greece opposed the

integration of the nation into the European community. In 1994 Greece closed her northern border to Macedonian commerce. In 1995 Greece conceded the use of the name and Macedonia adopted an eight-point Vergina Star as a national emblem.

Modern Macedonia is a small nation with insufficient economic, transportation, and communications infrastructure to sustain a prosperous economy or insure its viability as a modern state. Surrounded by larger nations and landlocked, Macedonia's main route to the sea runs through Greece to the Aegean.

Population

According to the 1994 census there are two million Macedonians. Ethnic Macedonians comprise 67% of the population. Macedonians are a southern Slav people closely related to Bulgarians. The Albanian minority comprises 23% of the population. The Albanian population may actually be larger since many Albanians, for political reasons, failed to participate in the census. Most Albanians are concentrated in the west of the country, particularly the northwest. Other ethnic minorities include Turks 4%, Gypsies 2%, Serbs 2%, and Pomaks (Slavic Moslems) 2%. Most of the Slavs are Orthodox. The Albanians and Turks are primarily Moslems, though some are Roman Catholics.

The Albanian minority is a major social problem. Albanians consider themselves a disadvantaged minority, under-represented by state structures. This feeling was reinforced by a 1992 law stipulating a 15-year residency

requirement for citizenship. Many ethnic Albanians are itinerant between Kosovo and Macedonia, and were therefore disqualified from citizenship. Struggling to assert their place in Macedonia, Albanians demonstrated in support of the creation of an Albanian-language university in Tetovo in 1995. The government, however, opposed the university.

Macedonia's flag today (left) and before 1995 (right)

Copyright The Archive of Macedonia 1998

Language

The Macedonian language belongs to the group of southern Slavic languages that includes Bulgarian, Croatian, and Serbo-Croatian. It is most closely related to Bulgarian. There are two main dialects: West Macedonian and East Macedonian. It is written in the Cyrillic script. Christian Church records are in Church Slavonic, a liturgical language related to Macedonian and written in an old version of the Cyrillic script. Official records such as census records until 1912 are in Ottoman Turkish (Arabic script).

Genealogical Sources

Parish registers

Virtually the entire Christian population is Orthodox. Based on a Serbian pattern, parish registers probably exist for the period 1800-1946, and are located in churches or various archives. With the advent of civil registration in 1946, parish registration was probably abolished.

Civil registration

Ottoman population registers (see below) served as civil registration until 1913, when Macedonia became part of Serbia. There was no civil registration in the Napoleonic sense of the term until the communist takeover of 1946. Civil registration offices now function under the Ministry of Internal Affairs.

Censuses

Censuses were conducted in conjunction with Ottoman population registers (see below) until 1913. The first national census occurred in 1921, when Macedonia was a part of Yugoslavia. Yugoslavian census returns are most likely to be in the Yugoslav National Statistical Office in Beograd, though there might be a local copy in Skopje.

Ottoman population registers

Population registers and census returns were introduced concurrently in 1829-1831. They were amalgamated into a single system of record keeping in 1881-1889. Registers and

returns were kept by officials at the kaza (district) level. The administrative divisions of 1831 were changed in 1864-1871 and remained in effect until the Balkan Wars of 1913. The reason for population registration before 1881 was to levy taxes on non-Muslims and to identify Muslims for conscription. Only males were registered. After 1881 the census was conducted to establish population figures for a variety of social and political purposes. All individuals were counted in both census and population registers after that date. Registers for Muslims included the name, birth year, birth date of people moving in from elsewhere, height, complexion, eye color, date of death or departure if moved, and other dates with regard to military service. Military information is most likely absent from registers for non-Muslims. The post 1881 registers document all family members by sex; birth date, residence; age; religion, craft or occupation; marital status, marriage date; health, and military status. The names deceased persons are crossed out and a death date noted.

Many individuals were not reported in census returns due to geographic isolation, difficulties in communication, and the resistance of some groups to being registered. Even after women were counted, their total number was consistently half that of men. The Muslim population was undercounted more often than the Christian population since Christians were sedentary, compactly settled, and easily accessible. Population registers functioned well until 1853. Due to the Crimean War they were then neglected through the 1860s and revived in 1913. Registers are probably located in the State Archive of Macedonia while some are probably in the Ottoman Archives at the Topkapi Palace in Istanbul, Turkey.

The genealogical sources of Macedonia have often been threatened by destruction incidental to war. The Balkan wars, as well as the devastation of WWI, contributed to an extensive destruction of archives. In the period between the two world wars, the state archive in Beograd gathered Macedonian records. The occupational government during WWII destroyed the archives of Skopje. The Archive of Macedonia was established in 1951, but an earthquake destroyed the facility in 1963. A new building was completed in 1969. There are nine regional archives located in Bitola, Kumanovo, Ohrid, Prilep, Skopje, Strumica, Tetovo, Titov Veles, and Stip. Because of the late date at which the various archives were formed, there is a strong possibility that important genealogical sources have not been gathered into the archival system.

Much is still not known about the holdings of Macedonian archives. Many records from this country are probably still kept in Serbian archives, which also remain largely unexplored. Macedonia is a virgin area for researchers who are interested in developing professionally and contributing to the knowledge of this place. Despite the current conflict in the region, this may yet be a good time to explore Macedonia's archived treasures of history.

Descendancy Research in Genealogy

© by Chauncey C. Riddle, PhD

Introduction

Descendancy research is the creation of a genealogical record of all of the natural and/or legal descendants of a given person. There are many reasons for doing descendancy research. One might be to give honor to a person by creating a family history of them and all of their descendants. Another purpose could be to establish the legal heirs for inheritance or other benefits, or to create a database for genetic research. Descendancy research can also make it possible for living relatives to communicate with each other. The number of possible beneficial uses of this kind of research is great.

In many ways, descendancy research is the mirror image of ancestral research. The following is an outline of some of the main differences and similarities between these two approaches. This will lead into a more detailed discussion of descendancy research, including a step-by-step explanation of the basic process, advice on organizing and documenting your work, tips on how to overcome unique obstacles, and tools and strategies that will help you reach your research goal.

Descendancy Versus Ancestry

Goal

While the purpose of ancestral research is to find all of the direct line ancestors of a person, descendancy research heads in the exact opposite direction. This presents a very different set of challenges to the genealogist.

Finding all natural and legal heirs of a person invariably requires the researcher to spend most of his time searching for answers among the living. This is demanding because people are not always aware of or ready to share the truth about their own families. Often children who died young are forgotten, those born out of wed-lock are ignored, those disinherited or in disfavor are not mentioned. The researcher must practice getting as many sources on a family as is reasonably possible in order to overcome these difficulties. And the researcher must pay attention to delicate situations where the truth is so painful that people cannot face it. Discretion is advised.

Volume

Ancestral research is fairly straightforward, with the number of ancestors doubling each generation. The number of people usually quadruples, however, when going in the other direction. The sheer volume in descendancy research is sometimes staggering. Where one person born around 1900 may have only a few descendants or none at all, some from the same period have hundreds. A person born in the early 1800s may have as many as 20,000 descendants, so the descendancy researcher must be prepared to handle volume.

Sources

The ancestry researcher deals with living persons back to about 1920, then spends most of the time working with the records of deceased persons. The descendancy researcher, on the other hand, must hone the skills of finding and cultivating living persons as the primary sources of genealogical information. If the target person was born after 1920, almost all of the research must be done among living persons, though many good and available vital records exist after that time. For persons born before 1920, the record evidence is better and more available, but the majority of the natural and legal heirs are usually still living.

Obstacles

Genealogists typically encounter obstacles when there is a lack of record evidence or when records are inaccessible. For descendancy researchers, however, the inability to find living persons or their relatives is the principal problem. Sometimes no living relative can be found, which may make further progress impossible. When desperate, one might employ a professional searcher. They charge handsome fees, but the finding of a lost branch of the family might make the fee well worth while.

Another obstacle is the unwillingness of some to divulge information. Because of the scams which many persons have suffered, it is necessary to gain the confidence of those from whom information is sought.

Strategy

The basic strategy in all genealogical research is to get firmly in control of all that is already known, then look for the unknown. Those who go to an interview, a genealogical library or a repository with a well-developed set of data fare far better than those who are unprepared.

Standards

Where the ancestral researcher must carefully document everything possible and depend upon overwhelming circumstantial evidence otherwise, much in descendancy research cannot be documented in the usual sense. Descendancy research among the living depends heavily upon personal testimony.

The difficulty of documenting descendancy research means that descendancy research must always be taken with a grain of salt. The researcher tries to present a record which reflects the actual truth of the matter, but is often unable to vouch for the complete accuracy of the record.

But then, inaccurate or falsified records exist in ancestral research. The bottom line is that all genealogical research, ancestral or descendancy, suffers from two problems: We can never be sure that either is completely accurate or completely finished. But we can do our best.

Table summarizing the comparisons between ancestral and descendency research

	Ancestral Research	Descendency Research
1. Goal	Find all direct line ancestors of a person.	Find all natural and legal heirs of a person.
2. Volume	Doubles every generation going back.	Usually quadruples every generation going forward.
3. Sources	Living person back to about 1920, record evidence before that.	Record up to about 1920, living person after that.
4. Principle Obstacles	Lack of record evidence. Inaccessibility of records.	Inability to find living person. Unwillingness to divulge information.
5. Strategy	Firstly gather the known, then proceed to the unknown.	Firstly gather the known, then proceed to the unknown.
6. Standards	Must document everything possible.	Must accept much personal testimony, but document as much as possible.

Tips for the Descendency Researcher

The Descendency Research Process

The basic process of descendency research begins with finding record evidence on the target person. Gather all that can be known about the person, emphasizing the three aspects of family history: First, a complete and accurate genealogical record (all of the vital data); Second, a complete and accurate biographical account; Third, all of the pertinent pictures and artifacts which will enliven the historical account being created.

The next step is to trace forward in time in the record evidence to the children, spouses of children, grandchildren, etc., of the target person, gathering all of the necessary elements for the history as mentioned in step 1.

When it is possible, convert from primary research in the available records to research among living members of the family. In the United States of America, the transition from records to living sources usually takes place about the year 1920.¹ One must switch from the scholarly techniques which enable good record research to the "people skills" which enable the researcher to communicate with and gain information from living persons.

The final step is to bring the work to fruition by creating a permanent record of what has been assembled in the descendency research. This may be a volume of family history, a moving picture/narrative account, or a computer genealogical account. Since family lies are among the most important things in this world, creating and preserving a permanent record of a family is a great contribution to the culture and history of this world.

Developing a Research System

The very first thing any researcher should do, before beginning the actual gathering of data, is to build a research

system. The research system is a series of information funnels which places each item of pertinent information encountered in research into a permanent storage place and format which allows immediate access for deposition and retrieval. (There is nothing so frustrating to a researcher as to remember that a certain piece of information was once obtained but to be unable to locate that piece of information for present use.) The following types of files have proved to be valuable to the descendency researcher:

A name, address, and telephone number file is essential to keep in touch with living relatives, contacts at libraries, archives, and other record repositories, and other important connections.

Another essential component of the research system is a computer genealogical record. This should be created using a standard genealogical program, that is, one which is commercially available and has GEDCOM capabilities. GEDCOM is a computer data format which allows all persons using standard genealogical software to send data to any other person using standard genealogical software so that data can be transmitted without the necessity of keyboard re-entry of data. Examples of standard computer genealogical programs are Personal Ancestral File, Family Tree Maker, Legacy, and The Master Genealogist.

You should create a biographical/historical file so that historical data which relates either to individual persons or to larger groups can be retained, retrieved, and updated conveniently. This information may be stored in the genealogical software, or it may simply be located in the files of a standard word processing program such as WordPerfect or Word. The advantage of storing the biographical and historical data in a word processing program is that editing is usually easier with a word processing program than with genealogical software.

It is also a good idea to have a file for photographs, documents, and artifacts which are important to the family

history that is being assembled. Not only should one keep a file of the photographs and other items, but equally important is a computer file listing which photographs or artifacts one possesses and several ways of accessing those photographs. It is wise to keep complete captions of each photo in the computer list. The ideal is that one would be able to locate quickly and easily any photograph of any given person or place by referring to the computer record, which serves as an index, then being able to locate the actual photo in its proper file. It takes time to develop the photo file and its comprehensive index, but when assembling family history records, the time is made up by the ease and accuracy of assembling necessary information.

Having these four information funnels well-developed and well-used is one mark of a competent researcher.

General Rules for Descendancy Research

Document everything! This is the first rule of scholarly work, of which genealogy and family history are a subdivision. Documentation should be accurate and complete, so that any person of normal intelligence could find and use the same source from the notations given. Work produced without documentation is essentially garbage. There are some good things in garbage, but wading through historical garbage to find the good is usually a waste of time. One might just as well start from scratch as to accept an undocumented account in one's historical research.

Be thorough as you go. With every contact or location, gather names, addresses, telephone numbers, genealogy, biography, photographs and artifacts or representations of artifacts at the time you are visiting with a family member. When you go to a repository to do research, gather every relevant item in one visit if possible. It is true that in the process of research one uncovers new information which makes it necessary to revisit persons or repositories, and this cannot be helped. But to be thorough as one goes makes for great efficiency and therefore for greater long-term production of records of value.

Send out more information than you receive. When you contact living family members, if you give them what you already know about their family, you probably will give them some information which they do not already have. Usually they will value this information and be more willing to share what they know in return. The usual experience in research is that the more you give out, the more you are likely to receive in return.

Overcoming the Inadequacies of Personal Evidence

Get as many personal witnesses of the data you are gathering as you can. If parents give you the names and birth dates of their children, check those spellings and birth dates with the children. Parents and children do not always agree!

Where possible, verify personal evidence with record evidence. Sometimes living persons will tell you about their marriage which took place on a given date and a given place, but research into the record evidence fails to uncover such a marriage at that time and place. One must decide to widen

the record search in place and time or simply accept the unverified personal witness.

Remember that among the living, you will get more information by telephone than through the mail. A large segment of the present population does not communicate often or well in written form. Recognizing that, it is important to visit or to contact over the telephone if you need information from a given person. Mail contact is indispensable, but you will mail inquiries and requests to many persons in vain. However, many of them would tell you what you need to know orally if you were able to speak with them. E-mail provides another alternative to regular mail and personal contact.

Again, remember the importance of bringing the work to fruition by publishing. Not to do so is to deprive the relatives of some very precious information, which may also deprive them of appreciation for and contact with their relatives. To add to the body of reliable information available to the family is to render a service which has no foreseeable limits to its benefits.

Gathering Information from Living Persons

One of the principal problems encountered in descendancy research is the reluctance of living persons to divulge what they know about the family. It is true that some things may be better left unsaid, but there is a minimum of information on each person which should be ascertained and recorded to make a good record. Here are some ways of operating to engender trust in your contacts:

When you contact someone, be very open about who you are, how you are related to them or why you are interested in them, and to what use you intend to put the information you need from them.

It helps when you review with your contact the information you already have about them or their family. This shows them that you have done your homework and are serious about the business in which you are engaged.

Ask only about the immediate family of the person. They will usually be comfortable about giving such information, whereas they will generally be very reluctant to give information about grandparents, uncles and aunts, cousins, etc. If they seem very knowledgeable or if they volunteer information about extended family, that is well and good, and what they say should be carefully recorded for future reference. But otherwise, expect that the best you will get from them may be names, addresses and telephone numbers.

When family members give you information, send it back to them in written form, via your genealogical or word processing computer program for them to check your data. Sometimes you have stirred memories which have long lain dormant, and since speaking with you, they may have remembered more clearly. It is always good to verify what you understood them to say. Ask for corrections and send them a self-addressed envelope with postage for return.

Send out only high quality printouts. Be sure the spelling is accurate and the information as correct as you can

make it. Do not hesitate to share your documentation. Warn them that what you send is work in progress and invite them to participate in creating a first-class historical record. Some of them will care about that.

Be prompt in replying. This shows you are serious about the research.

Always send a "thank you" note when people give you information or send you something; or you can thank them by telephone. Do be generous in gratitude.

Return pictures promptly. Pictures are usually very precious to people, even if they don't look at them very often. Treat them with great respect and return them quickly with thanks.

Research Tools

There are certain tools which will facilitate your descendant research. The following are suggested:

- A good computer. A lap-top is especially valuable because it can be taken with you to interviews or to repositories. When you are doing research, often you will need to check a date or location for someone in your present research target, and having your database at hand is most useful. The computer is the way to store and manipulate your data once it is gathered.
- A standard genealogical software program.
- Auxiliary genealogical programs. These are utilities which do things the main-line programs do not easily do, such as rearrange data, make data substitutions, print out descendant or ancestry quickly and efficiently, etc.
- A word processing program, such as mentioned above, to store and organize biographical and historical data.
- A book producing program, such as Genbook, Legacy, or Family Tree Maker. Once you have the data, producing a good book with these programs is comparatively easy.
- A 35 mm. camera. It is best to use with a stand, and to have magnetic strips to hold down picture edges when copying photographs. A good film to use is Kodak T-Max100. Ibis is a fine-grained black and white film which gives great results. Almost any light source will do; better a little too little than a little too much light because of the problem of glare under bright light sources. Use the timer function on the camera to click the shutter; this avoids moving the camera when the shutter aperture is open.
- A scanner. You scan photographs to put them in the digital format, which the computer requires for the creation of a historical record that includes pictures and other graphic representations. Scan photos at about 150 dots per inch. When scanning color photos, increase the light and contrast both about 50% over what would be normal for black and white scanning to give strong and clear images.
- Postscript capability. For producing work in electronic form through a commercial printer, it is

useful to have Postscript printing capabilities in your computer. As you put the genealogical data, the biographical material and the photographs and other graphics together in the final draft of your work, the Postscript capability of your computer will print your work to file in sections which have a ".prn" suffix. When the text is heavily loaded with pictures, it is best to include only about five text pages, or about five megabytes in each ".prn" file. This enables your printer easily to reassemble and to print out the entire work.

Important Sources

Another category of valuable assets are the search tools one may use in descendant research:

- Phone directories. There are a number of phone directories for entire nations available on compact disks. Also very useful and accessible are the phone directories available on the Internet.
- A ZIP Code directory. Ibis is useful for checking spellings, nearby locations, counties, etc.
- Good maps. One does well to keep both the geography and the topography of the area you are doing research in well in mind.
- Research repositories of genealogical data, such as family sites on the Internet, Ancestral File, International Genealogical Index, U.S. Social Security Death Index, etc.
- Census records.
- Vital statistics repositories, such as county courthouses, state and national archives and indexes.
- Published family histories, usually found in genealogical libraries.

Descendant Research Strategies

Also useful to the descendant researcher are strategies for searching for descendant information:

- Network in families, finding out where their siblings, children, and cousins are.
- Call and write persons with the target surname in the area of research. Though time-consuming, this often will produce results otherwise unobtainable.
- Use on-line computer services to make queries about needed genealogical information.
- Research data-bases of genealogical information. Genealogical libraries usually have arrays of compact disks which contain large databases of information. There are also on-line databases on the Internet which allow worthwhile searching.
- Go to the target area of research. Search vital records at courthouses, visit cemeteries and funeral homes to search records, consult with local genealogical societies, talk with neighbors of deceased relatives, and search newspaper archives.
- See-saw your research efforts. This means to follow the family forward in time until you hit an insurmountable obstacle. Then, reverse direction and do ancestral research on the people you already have,

followed by descendency research on the group of relatives wider than the original descendency target. When you locate descendants of cousins of your original research target, they sometimes have information which you could not find about your original research target.

Keep Your Research Goal in Mind

The ultimate strategy of descendency research is to keep your research goal firmly in mind and to persevere until you have accomplished your objective. This is a work which is often difficult and discouraging, but it is also very rewarding. The ingenuity of the researcher is generally the only limit to what can be accomplished.

May you have great success in creating and making permanent your record of your descendency research !

Chauncey Cazier Riddle received a bachelor's degree in physics from Brigham Young University, followed by a master's and doctoral degrees in philosophy from Columbia University. In 1993 he retired from the faculty at BYU after more than 40 years of employment. A distinguished teacher, Dr. Riddle also held the administrative positions as Dean of the Graduate School and Assistant Academic Vice President. Dr. Riddle has spent years researching Riddle family history. His recent work includes several volumes documenting the descendants of John Riddle in Virginia.

The German Migration to the East

© by Jerry Frank

[This article is adapted from a lecture given by Mr. Frank at the FEEFHS Fourth International Convention, held in Salt Lake City September 27 to 29, 1997.--Ed.]

Introduction

I am writing this as an amateur genealogist, not a professional historian. I have taken the time in my genealogical study to research the movements of the German people to the east, and from there to North and South America. My ancestors did not leave any verbal or written history behind them, so I undertook this research to gain a better understanding, in a general sense, of their movements. Use of a good historical atlas in conjunction with this written text will assist the reader in following the migration patterns recorded.

Before we talk specifically about the German migration, I would like to spend a few minutes on migration in a general sense. I spend a lot of my genealogical research time on the Internet. Over and over again, I see people posting questions like, "What happened in 1850 in Prussia that would have caused my great grandparents to move to Canada?" or, "What disaster could have occurred in 1810 that would have caused my German ancestor to move from Congress Poland to Bessarabia?"

What causes people to move? We can all think of answers to this question because all of us are immigrants! We might have been a solitary migrant or we might have been part of a general movement, but regardless of the circumstance, we are all immigrants. Our reasons for moving might include:

- some military reason (war, displacement because of war, draft)
- climate or possible physical danger (too cold, too many earthquakes)
- political oppression (lack of freedom)
- a friend or relative encouraging you to follow them
- religious persecution or oppression
- promise of jobs or improved economic situation

All of us who have moved understand our own motivation for doing so. But will your great great granddaughter understand why you migrated when she studies her genealogy? Will she ask, "What happened in North Dakota in 1985 that caused my great grandparents to move to California?" Unless you specifically write down your reasons, the probable answer is "No."

While we may not be able to understand exactly what motivated an ancestor to migrate, we can at least observe migration trends that can help us in tracing our genealogy. The rest of this article consists of an overview of German migrations to eastern Europe. You still may not discover

why your ancestor moved, but hopefully you will have a better general understanding of the migrational trends.

Early German-Slav Conflict

When we talk about the migration of the Germans to the east, we are talking about their movement from historically German territory to historically Slavic territory. The border between these two territories has not changed much over the centuries. It has been the same for most of recorded history. It is true that political boundaries have moved in both easterly and westerly directions. At times Germans controlled Slavic lands, while at other times the Slavs controlled German lands; but overall, the boundary between the two is aligned with the old eastern boundary of the Holy Roman Empire of 1250 AD.

Poland for centuries was one of the most powerful of the Slavic nations. It was Poland that requested the assistance of the Germanic Teutonic Knights in protecting portions of its land holdings along the Baltic coast. These knights brought with them significant German settlement to areas that later became Prussian territory. This early move eastward (after 1100) was motivated by military action.

Along with this early migration of Germans came the inevitable intermarriage with other ethnic groups like the Slavs and Magyars. In the process, some tribes, like the Prus (from which Prussia gets its name), were eventually wiped out. Others like the Kashubians from the region southwest of Gdansk, assimilated into both German and Polish cultures. There are very few people left today who can still speak the ancient Kashubian language. Because of these assimilations, it is important to be aware that speaking the German language and practicing German customs does not mean that your ethnic origins are purely German. This is especially true for those of you with Germanic origins in Prussian and Silesian regions (modern north and southwest Poland) and to a lesser extent Hungarian regions. On the other hand, if your surname is something like Novak, Lewandowski, Berkowski, Girschewski, etc., it is quite possible that you might have strong Germanic connections.

More peaceful migration took place because the technical skills of the Germans proved to be beneficial to the more medieval nations like Poland-Lithuania, Bohemia-Moravia, and Hungary-Croatia. These countries invited Germans in to develop agriculture and mining in their regions and later to further their industrial causes.

Development of German Law Cities

As Germans developed colonies to the east of the Holy Roman Empire between the 13th and 16th centuries, they brought with them not only models of urban layout but also models for governmental control of their cities and towns. The distinctive characteristic of German law is that it

allowed residents to direct their economic activity and government through the election of local city councils. These city councils acted independently of political rulers and religious leaders. They often had their own court system, which controlled criminal and some civil matters. Sometimes they even had their own militia.

This system of government was known as German city law, and it was comprised of three basic types with many variants: Luebeck Law, Magdeburg Law, and Nuemberg-Vienna Law.

As Gennans, primarily tradesmen, migrated to new areas in the east, they brought this law and associated privileges with them. The spread of this law into Slavic lands began in the early 13th century in three areas. The first was in territory along the Vistula River controlled by the Teutonic Knights. The second area was in the upper Oder River valley where a weakened Polish State granted them the privileges. The third area was to the southeast - Bohemia, Moravia, and Hungary / Croatia where the respective kings had initiated significant immigration.

By the 14th century, German migration to the eastern cities had spread throughout Poland, Galicia, Volhynia, and south into Transylvania. Use of Gennanic law continued to spread eastward in the 15th century, though it was the government of Poland Lithuania that was introducing it, rather than the Germans. Even Russia favored it, granting the privileges of Magdeburg Law to cities like Kiev, Smolensk, Orsha, and others. This law remained in effect in different parts of Russian controlled territory as late as 1830.

While the spread of Germanic city law through the migrations of German city dwellers did not result in large numbers of migrants, it was a very important factor in the later spread of German settlement throughout the east. Many of these cities had, at least for periods of time, German mayors and judiciary, who helped to develop the law systems. Royalty and nobility in the east, the primary motivators of much of German migration, were familiar with German ideas, laws, and customs. They did not fear the Germans in these early years, and encouraged them to come to their lands.

As the migration developed in a more rural manner, the concepts of Germanic city law also trickled down to the village level.

The primary form of a German village was based on the Schulzendorf system. The landowning noble would make a deal with an enterprising person, who would guarantee a certain amount of settlers in exchange for rights to double the amount of land that a settler would normally receive. This person would also generally gain the right to own the flour mill, brewery, and other perks.

The Mennonites who came to Poland in the early 1500s rejected this form of village government. They insisted, and were granted the right, to establish their own village laws with freedom of the individuals within the village. This form of village government, similar in nature to the Germanic city law, was known as a Hollandry.

With ongoing settlement in Poland, other religious

groups also adopted this form of village government.

The Danube Swabians

Up until about 1700, German migration was gradual and somewhat evenly spread out. It was also mostly limited to the western edge of the Slavic lands. It is only after the demise of the Ottoman Empire that we begin to see waves of migration spreading into pockets of land further to the east. One of the first migration waves comes with the movement of the Danube Swabians to the frontier regions of the Banat, Backa, and Slavonia.

Swabia is a region with its own dialect in northern Wuerttemberg, centering around Stuttgart. While this region gives its name to this migration movement, it is important to note that most of these immigrants actually came from other southern German and Austrian provinces. Three waves of settlers moved into this area of central Hungary in the years 1718-37, 1744-72, and 1782-87.

The Austrian Hapsburgs, who gained control of this region through the Treaty of Passarowitz in 1718, wanted to achieve 3 goals: fortify the land against invasion, develop the farm land, and solidify the hold of the Roman Catholic Church on those areas. To encourage settlement by Catholic Germans, they were offered free agricultural land and home sites, construction material and livestock, and exemption from taxes for a limited period of time.

Most of the people who accepted the offer were of the poor peasant class, accustomed to heavy taxation and military conscription. Reference to the Danube comes from their prime transportation route. Starting at the city of Ulm, they boarded *Ulmer Schachtel*, a type of boat that sailed that river. Some also traveled along the river in covered wagons.

This migration was particularly extensive. I don't have a number for the first wave but we know that at least 15,000 of them died from either Turkish raids or from plagues. The second wave of 75,000 immigrants was, in part, brought in to replace those losses. The third wave of 60,000 immigrants built on the first two and ended up with reasonable economic prosperity. In all, over 1000 villages were established in southern Hungary.

The Volga Germans

Another very large and significant German migration, the one which went farthest to the east, was that of the Volga Germans. This migration was a peaceful one that took place under the invitation of the Russian Czarress, Catherine the Great. To understand this migration, we need a bit of background as to how it occurred. There are similarities to the Danube Swabian migration, but the target immigrant was much different and the perks given were more extensive.

In 1762, Russia, under Catherine II (Catherine the Great), issued a manifesto inviting foreigners to settle in Russia. While some artisans were attracted by it, it generally was not considered very successful. Russia had vast territories to the east which it wished to settle. There were two reasons for this. The first was to encourage cultivation of the vast steppes and development of mining, commerce,

and manufacturing. This was the reasoning used and promoted in the manifesto. A more subtle reason hidden in the background was the development of land in a region that was causing them military problems by way of raids by Mongols on the eastern frontiers. New settlements would provide a buffer zone between the eastern hordes and the Russians.

When the first manifesto failed, Catherine introduced a second one in 1763 which included privileges that made it more attractive. The primary ones included:

1. For those who could not afford it, travel expenses would be paid for by Russia.
2. Free land was granted for tillage in certain limited areas, primarily in the Volga River region.
3. Freedom to practice their religion (assumed to be Christian) and to build churches. They were not to proselytize their religion to the Russians, but they were free to encourage Moslems on their borders to convert.
4. Freedom from paying taxes and tributes for 30 years for those colonizing uncultivated territory; for 5 years for tradesmen in certain stipulated cities; and 10 years for all other cities.
5. Free lodging for the first 6 months.
6. Interest free loans to build houses and to purchase farm equipment and cattle, repayable within 10 years.
7. Right to internal government of separately established colonies.
8. Freedom from import duties on all goods brought with them.
9. Freedom from military service.
10. Other inducements for manufacture of goods.

With these new enticements in hand, Russian representatives abroad, along with their hired agents, began to aggressively pursue immigrants. For various reasons, non-Germans did not respond well. Some countries that allowed free publication of the invitation were already enjoying relative prosperity and had their own overseas colonies. For example, an English speaking colony in America would be more attractive to an Englishman than would the strange and remote land of Russia. Moslems from Turkish lands foresaw enslavement by the Russians. The Hapsburgs in Austrian controlled lands were interested in maintaining their own settlement programs in Hungarian territory and forbade emigration. Similar situations existed in other parts of Europe, with the result that active promotion could only take place in free cities and states where such laws did not exist.

The inability of some of the German states to control emigration, combined with long standing suffering from widespread poverty, malnutrition, and unemployment brought on by feudal infighting, wars, religious persecution, and the general politics of the day combined to make the German migration as extensive as it was. The extent of this

migration was so great (4000 families in 1767 alone) that further migration was forbidden by the Prussian Emperor Joseph II. Migration to the Volga effectively ended within a short time but not before at least 25,000 made their way to Russia over a period of about 4 years. Most of them were from Hesse and the southwest states, but nominally from other areas, as well. The original migration resulted in the establishment of 104 villages.

Most historians have accurately stated that this invitation was open to all foreigners. However, the emphasis on the Germanic involvement by several German authors has left many people with the impression that the connection between German born Catherine and the Germans of the Volga River region was particularly significant and important. In talking to some people, one almost gets the impression that Catherine the Great personally appeared at the door of their ancestor to invite them to Russia. Furthermore, the traditional story of her invitation has been inaccurately applied to Germans in Galicia, Congress Poland, Volhynia, and even Prussia. Of these four, only Volhynia was under her rule, but there the Germans did not arrive in significant numbers till well after her death.

Here is an example of how such distortions occur, quoting from an online historical document:

"Much of this [territory in the Black Sea region] became Crown land upon which Catherine wished to settle industrious farmers, whose well kept fields might serve as models for the shiftless nomadic tribes about them. Catherine had perhaps heard of the Mennonites and their work of reclamation in the swamps of the lower Vistula, through her generals who had spent several winters in eastern Prussia during the Seven Years War. At any rate, however that may be, it was in the above year [1786] that she held out liberal inducements through her Special representative at Danzig, George van Trappe, to the Mennonites of that region to migrate to her Crown lands in South Russia."

The writer does qualify his statement by saying that, "Catherine had *perhaps* heard of the Mennonites." The casual reader conveniently forgets the *word perhaps*, and in relating the story to his friends, conveys some form of special relationship between Catherine and the Mennonites. The story also becomes slanted by the author's reference to the *special* representative, George van Trappe. He was indeed a representative but he was no more special than the other agents of the crown who were scampering about Europe soliciting new settlers for Russia.

The simple truth is that Catherine had left behind her German heritage, marrying into Russian royalty as a young teenager. She didn't just invite Germans. What's more, the Germans received no privileges that other foreigners did not receive, either at the time of migration or later on.

The migration of the Mennonites requires specific mention because they are somewhat unique within the German migration context. The earliest Mennonites in the east were actually Dutch, who used their diking skills to reclaim extensive arable land from the Vistula River delta

region in Prussia. They began to arrive in the early 1500s. It did not take long for them to be mixed with Hemish, Gennan, and to a lesser extent, Swiss Mennonites. In addition, some of Polish and Swedish origin became mixed into the migration. Because of their close ties to German traditions, and their use of the Plattdeutsch dialect, they tend to all get lumped together as Germans.

The pacifistic Mennonites from Prussia were especially attracted by the promise of freedom from service in the military—a privilege that did not carry a time limit with it. Thousands of them took the challenge to migrate to the east. The most extensive settlements were on the hilly west side of the Volga. To the northeast, on the meadow or east side of the Volga, was another large group of settlements.

By 1816, there were no new settlements but the population had almost tripled, and new colonies became essential. By 1865, there were 170 German Volga villages with a population of over 259,000. Much of this growth was simply the result of large families, but there was ongoing new migration into the area by Mennonites, Lutherans and Catholics. By 1914, they had grown to over 500,000.

Part of the population problem was eased with the establishment of daughter colonies in the Caucasus region, which attracted significant numbers of Germans away from the Volga River area.

Finally, it should be pointed out that other isolated colonies were established—some by other religious denominations than the major ones, others at the request of certain isolated land-holding nobility.

Baltic Germans

Germans had a presence in the Baltic provinces of Russia hundreds of years before the Manifestos of Catherine the Great. However, they were primarily people with specialty trades or connections to nobility or politics. This presence stemmed from the control of the Estonian, Livonian, and Kurland provinces by the Teutonic Knights.

Under the Manifesto of 1763, several smaller groups of Germans were able to establish themselves in the Baltic regions under special contract with private individuals or government agencies. Over 300 families answered the initial calls, with a 1000 or so individuals following later. Most settled in villages, under private contract, in relatively close proximity to St. Petersburg.

The Black Sea Areas

In the next few years after the second Manifesto, Catherine the Great expanded Russian territory dramatically by conquering Turkish controlled land to the south and Polish land to the west. Catherine again wanted Germans to help in developing her new territories, especially around the north side of the Black Sea. This time she turned to the Mennonites of West Prussia.

Mennonites, being a pacifist denomination, were concerned by the political climate of Germany in the latter half of the 18th century. Frederick William II was demanding payment of heavy fines in lieu of military service and forcing

the Mennonites to pay tithes to the established Lutheran Church on earlier land purchases from Lutherans. Mennonites were particularly attracted to Russia by the offer of freedom from military service. In 1789, 228 Mennonite families arrived at Chortitza on the Dnieper River. They had been preceded to the general region by a smaller group of Lutherans. The Mennonite migration continued into the area for another 80 years with thousands more families answering the call. Thousands of other Germans followed the Mennonites.

Lutherans and Catholics began flooding into the area, especially after the Napoleonic wars (1803 through 1810). They not only came from the southwest German states but also from West Prussia, Hungary, and Poland. Hundreds of German colonies sprang up in a semi-circle around Odessa, now in the Ukraine.

In 1804, the new Czar, Alexander I, extended another invitation to settlement in this region. However, his invitation was more specific than Catherine's. He wanted people who were particularly skilled in agriculture and handicrafts—well-to-do farmers with skills in viticulture and management and breeding of livestock. While they received some traveling assistance, they were also expected to bring along a significant worth of cash and goods.

Travel to the Black Sea region was by two primary routes. The first was the Danube River, where they traveled right past the Danuswaben settlements on their way to their new home. Travel was conducted on boats called Zillen. They were crammed with a crew of four or five boatmen, and as many goods and passengers as could fit, even if overcrowded.

The other route was overland. Travel started on the Danube, but where it turned south, the colonists took to wagons pulled by oxen to make their way through the Carpathian mountains and then east to the Black Sea, much like the wagon trains crossed the American west during the 1800s.

I was not able to find a statistical population summary for this area, but it is safe to say that, like the Volga River area, the region around Odessa and the Crimean peninsula supported hundreds of German villages and hundreds of thousands of Germans.

Be rahia

Another war with Turkey brought Russia additional territory in the region of Bessarabia, on the west side of the Black Sea. In the meantime, Napoleon was marching through Europe, taking over vast quantities of land, including central Poland. Many Germans who had moved there after the third partition were now feeling persecuted by the Poles who were placed in power. The Russians took advantage of this by inviting them to move further east. Some went to the Black Sea region, while others moved to Bessarabia.

By 1816, over 1500 German families had moved into this area, most of them from Poland. They initially founded twelve villages, many with French names that reflected

battlefields where the Russians had joined the Germans in fighting the French-Arcis, Brienne, FereChampoise, Paris, and soon.

Migration continued slowly but steadily, with population increases coming from Baden, Württemberg, Hesse, and Alsace. By 1842, over 2000 families had settled in 24 villages. Only 114 of these were Catholic. The rest were Protestant, mostly Lutherans. As with other areas, the German population here grew rapidly. To accommodate the growth, another 80 villages were established, and many left for opportunities elsewhere. After accounting for the emigration, about 65,000 Germans remained in Bessarabia in 1905.

Several smaller areas around the Black Sea also received significant migrations of Germans throughout the 19th century, for example, the Dubrudja region of Romania south of Bessarabia is. This area was settled primarily by Germans who left Bessarabia.

Another area is Bukovina, a small region at the northwest end of Bessarabia. This area received, under the encouragement of the Austrian Emperor, an ethnical mix of migrants, among them a significant number of Germans.

To the east side of the Black Sea, there were German settlements in the south Caucasus, and by the end of the 19th century, even Kazakhstan and Siberia were receiving German colonists.

Galicia

Galicia was a region that experienced many different cultures and political control due to inept rulers. Its population was primarily a mixture of Polish and Ukrainian, with lesser numbers of Ruthenians, and of course, Germans. Control over the years bounced back and forth between Poland, Russia, and Austria. The area came under Austrian rule in the first partition of Poland in 1772 and remained so with some border variations until WW I.

German migration started early, at least in the western regions of Galicia, with an initial wave of soldiers, artisans, and traders arriving in the 14th and 15th centuries under the protection of Magdeburg city law. Most of these Germans assimilated into the Polish culture by the 16th century.

The second wave of settlers came in at the invitation of Austrian Emperor Joseph II between about 1781 and 1785. Over 15,000 arrived, primarily with origins in the Pfalz (Palatinate) region of the German states. These were supplemented by another 6000 after the turn of the century. Among the settlers were significant numbers of Swiss Mennonites, who later left for settlements in Russia. The majority of settlers in this period, however, were Catholic or Lutheran. While these Germans, in general, retained their cultural distinctiveness, significant numbers of the Catholic Germans did assimilate into the Polish culture.

Although there was strong Austrian political influence in the early years, the Poles eventually won semi-autonomy, to the extent that Polish even became the official language. The Germans did well in this state of relative political stability, but for some reason they did not experience the

same growth in numbers that other regions did. A 1910 census indicated only 65,000 Germans living in Galicia.

This situation is in large part explained by the fact that many Germans did not, for whatever reason, set down permanent roots in Galicia. Starting with the Swiss Mennonite movement to Russia, there was a relatively constant outflow of Germans for Galicia to many other parts of eastern Europe. Some moved northward into southeastern Poland, others east to Volhynia, Bukowina, northern Bessarabia, and the Black Sea regions. Still others turned west to Slovakia, Hungary, and even to Bosnia.

Poland

As we mentioned earlier, the northern region of what is now modern Poland had a very early Germanic presence. This presence intensified with a royal marriage between a Polish king and a German princess in 960 A.D. By 1150 A.D., the Catholic Church was beginning its mission through Poland, bringing with it German monks and farmers, who settled in villages under jurisdiction of the church cloisters. Finally, in 1230 A.D., the Teutonic Knights were invited in to help control the rebellious Prus tribe in the northern areas. The knights brought with them the German city law which we discussed earlier. In what is modern Poland, over 250 cities and towns were established with German city law.

The Catholics of Poland provided strong resistance against the Protestant Reformation of the early 1500s which resulted in significant anti-German sentiment among the Poles. German culture and identity were virtually eliminated during this time, either by expulsion or assimilation. This situation, however, left the Polish nobility with fewer skilled people to develop their lands with the result that they once again slowly started to invite Germans back into their country to work for them. These Germans established the villages we discussed earlier.

To further understand the influx of Germans to this region, we need to briefly look at the partitions of Poland. A weak monarchy allowed Russia, under the rule of Catherine the Great, to gain significant territories from them. Both Prussia and Austria feared this Russian expansionism, and in 1772, they agreed to take equal portions of Poland. It was at this time that all of Volhynia was taken over by Russia.

Continuing political unrest in Poland led to a second partition in 1793, with each of the three powers taking more land. The western portion, which contained most of the Hollendries and Schulzendorf, was taken over by Prussia. Finally, in 1795, the remaining land was split, and Poland ceased to exist as a nation.

Prussia established a new form of German settlement called a colony. Although the settlers invited in by the Prussians did not enjoy the same privileges as their predecessors, they did receive free travel expenses and additional assistance in building their farms. Most of the immigrants in the early years were Swabians from Württemberg. Many of them were cloth makers, who were attracted to that industry in the region surrounding Lodz.

Napoleon marched through Europe, taking over central Poland and Warsaw in 1807. He established the semi-autonomous state of the Duchy of Warsaw. Anti-German sentiment among the Poles became common, and resulted in the massive migration of Germans to Bessarabia, discussed earlier. However, in 1814, Napoleon's reign was cut short in defeat, and in 1815, the Congress of Vienna renewed the previous partition boundaries, with the exception that Prussia lost some of the central area to Russia. This central area included the Lodz region, where large numbers of Germans lived.

This central and eastern area of modern Poland was subject to Russian rule, but was allowed to operate in a semi-autonomous fashion. The anti-German sentiment was not as strong there, so Germans continued to migrate in significant numbers to this area, now known as Congress Poland or the Kingdom of Poland. In addition to the Swabians, large numbers of Kashubian, Pommeranian, and other Germans joined the migration.

The last part of Congress Poland to receive German settlers was in the east, the region around Lublin and Chelm, where some 230 colonies were established between 1850 and 1890. Many of these Germans were actually transplants from central Poland.

Most of the Germans in Congress Poland were Lutheran. There were a few Mennonites along the Vistula River, west of Warsaw. There were also some Baptists and Moravians in some areas. The larger towns had significant numbers of Catholic Germans.

It is difficult to establish an accurate count of these migrants because, they moved around often and many, as we have seen, moved on to new areas within a generation. Oscar Kossmann provides a list showing about 360,000 German members of the Lutheran Church alone in 1913. He also provides a list of 1200 German settlements. When his list of villages is compared to that of other authors and researchers, it appears that there may have been as many as 2000 German settlements.

Volhynia

Volhynia is an area located in the northwestern part of modern Ukraine. We don't know why Catherine the Great did not promote this area as a settlement region for Germans. There were a few Germans in the cities, but none in the rural areas, when Russia claimed this area for itself in 1772. It was about another 25 years before Germans started to come into Volhynia with the establishment of several villages by a group of Mennonites. They only stayed for a few years before selling their villages to some Lutherans sometime prior to 1830, and then moving on to the Black Sea areas.

The first large number of Germans to arrive in Volhynia came after the first Polish rebellion of 1831. Some 4000 or so moved in during the mid-1830s, almost all from Congress Poland. With some of them moving on to Podolia, Bessarabia, and other regions, the population remained fairly constant until after the second Polish rebellion of 1863. Many Polish nobles, who had supported this

rebellion, lost their land, and the contracts which the Germans had to work on it were no longer valid. The need for land in Congress Poland became acute.

At the same time, in 1862, the Russians released their serfs from a lifetime of servitude to the land. These serfs flocked to the cities, leaving Polish landlords in Volhynia with no one to work their land. Most of the other areas we have discussed were settled by Germans at the invitation of royalty. In contrast to that, the Germans in Volhynia were invited there by these landlords. They received no special privileges or freedoms in exchange for their move.

This combination of lack of land in Congress Poland and ample opportunity in Volhynia resulted in a mass exodus from the former to the latter. By 1900, census figures show some 200,000 Germans living in over 800 villages in Volhynia. It is estimated that around 75-80% of these had origins in Congress Poland.

Again, most of these migrants were Lutheran Germans with some Catholic, Baptist, Moravian, and Mennonite. The Lutheran parish of Zbitomir alone, not counting the parishes of Rozyscibische and Heimtal, shows over 2100 baptisms per year in the early 1880s.

Conclusion

While there were a few other small areas of German settlement in the east that we have not had the time to review, this about covers the story of the German migration to the east. However, I don't think it is fitting to end at this point. Most of these Germans had come to these strange lands with peaceful intentions, but their lives were to be dramatically altered by the impact of two world wars taking place within a 27 year span. I would like to close with a brief look at what happened to them during this time.

Many of our ancestors were fortunate to have left Europe for North or South America prior to WW I. They may have envisioned future problems in Russia and other parts of Europe, but more than likely, they were attracted by specific opportunities that were available in the Americas. Those who remained behind were not so fortunate.

A general policy of ruling powers, both during and after WW II, was to reestablish political boundaries on the basis of ethno-linguistic boundaries. Unbelievably large numbers of people, German and others, were impacted by this policy. Some 16.3 million perished during WW II due to military, political or racial policies. Another 15.1 million were displaced between 1939 and 1943, while a further 31 million were displaced between 1944 and 1948 - a staggering total of 62.4 million people.

As for the Germans, the Nazis had decided that those who lived in conquered Slavic lands should be moved to new areas in northern Poland. More than 3/4 of a million were thus moved during WW II. But the biggest wartime migration back westward for these Germans was the 5.6 million, who left both the original and the resettlement areas as the Soviet army pushed westward, starting in 1944. That count does not include those who fled from Hungary after the Red Army invaded that country.

Of those who didn't make it out of the Soviet occupied zones, some 500,000, were forcibly deported eastward into the deeper regions of the Soviet Union. After the war, another 6.5 million Germans were repatriated out of Czechoslovakia, Poland, and Hungary to both western and Soviet occupied zones of Germany. Many of these displaced Germans made their way to the Americas after the war.

Finally, hundreds of thousands of Germans remained trapped in the Soviet Union, most of them deported to nether regions of Kazakhstan and Siberia, many of them into forced labor camps. A few managed to stay in their home towns, mostly as the result of intermarriage with local ethnic groups. The result of all this is that most of us ethnic Germans with east European roots still have cousins in many different areas of Germany, Poland, Hungary, and especially in areas of the former Soviet Union.

The German migrations to the east have come to an end. With the fall of communism, many are now making their way back to the west, once again migrating with hope for the future - a future filled with peace and an improved life for themselves and their descendants.

Jerry Frank was born in southern Manitoba to parents of Volhynian German descent. He has been involved with the Wandering Volhynians magazine. He is the author of Germans From Congress Poland and Volhynia - A Research Tool and two family history books, Frank Migrations, and From Nagold to Thalberg. Jerry was also a speaker at the FEEFHS regional conference in Calgary, Alberta in 1995.

Glückstal Colonies Research Association

© by Margaret Freeman

[One of the primary goals of FEEFHS is to promote public awareness of member societies and their publications, services, and activities. This piece on the Glückstal Colonies Research Association (GCRA) and the following article on the Immigrant Genealogical Society (IGS) are the first of what will become a regular feature of FEEFHS Quarterly: articles highlighting FEEFHS member societies.-Managing Editor]

In 1987, three friends, Gwen Pritzkau, Carolyn Wheeler, and Margaret Freeman, found themselves discussing plans to start a group to research the ancestry of all families in the Glückstal Colonies of South Russia. These four villages included: Bergdorf, Glückstal, Kassel and Neudorf, as well as the daughter colonies of Klein Bergdorf, Klein Neudorf, Neu Glückstal, Krontal and Marienberg (others were added later). This trio had done enough research on their families to be aware of the extensive intermarriage among the residents of the villages, and the movement from one village to another, so researching all simultaneously seemed to be a good approach.

They asked another friend, Arthur Flegel, a well-known Russo-German researcher and certified genealogist, to advise. Various members of both the American Historical Society of Germans from Russia, and the Germans from Russia Heritage Society also offered encouragement. As with other organizations, the group learned as it grew, handling start-up problems, the costs of a business license needed to obtain a bank account, and the endless details involved in obtaining tax-exempt status. Now the group has grown to a large circle of volunteers who are generous with their time and expertise.

Our "GCRA Newsletter" first appeared in late 1987. GCRA has now published twenty-two issues. Through the efforts of many hardworking members, GCRA has also published several books, including "Glückstal Colonies Marriages," "Glückstal Colonies Births and Marriages, 1833-1900," "Glückstal Colonies Deaths, 1833-1900," and "The 1858 Glückstal Colony Census." The data for the books on marriages, births and deaths was found in the records of the St. Petersburg Consistory, available on microfilm at the Family History Centers of the LDS Church. All were translated and authenticated by our members; the book on births and marriages alone has over 22,000 authenticated entries. We are currently working with North Dakota State University, who published the books on births, marriages, and deaths, to translate and publish the books in German. We are indebted to Harold Ebrman, who designed the books, coordinated the collection of data from members, did the necessary programming to prepare the manuscript, and produced the computer files for publication. He also maintains the GCRA web site.

A primary focus of GCRA has been to develop cooperative relationships with the Germans from Russia Heritage Collection, part of the Ethnic Studies Library at North Dakota State University in Fargo, North Dakota. NDSU not only published the GCRA books, but now has laminated maps available of the colonies. They also provide the site and facilities for the GCRA LISTSERV—an unmoderated, free exchange Internet site for the sharing of data. Information about our group is available on the FEEFHS web site, and GCRA is listed as Village Coordinator at both the American Historical Society of Germans from Russia and the Germans from Russia Heritage Society sites.

Key GCRA members (left to right): Gwen Pritzkau, Harold Ebrman, Margaret Freeman, and Carolyn Wheeler

As 1999 begins, the group has reached a membership of four hundred individuals, throughout the United States, Canada, Europe, and Asia. With our dues and gifts, we have been purchasing data from Ukrainian and Russian archives, (with the exception of the 1858 census of Glückstal which was purchased jointly by AHSGR and GRHS) which is translated and published, and our goal is to continue doing so as long as there is data to obtain. As part of our outreach program, GCRA will join with FEEFHS and IGS for a September 1999 GCRA Workshop Day. We plan to continue making Glückstal presentations at the annual conventions of the Germans from Russia societies.

Membership in GCRA is based on a calendar year, and currently the annual fee is \$20.00. For that price, a member receives two newsletters a year (in 1998 GCRA published 64 pages of research materials) and an annual update giving the list of members and the lines they are researching in both a straight research list and a cross index. As data becomes available, it is duplicated and sent out to members via snail-mail, fax, and e-mail, which complements the extensive personal communications among the members themselves.

GCRA will continue publishing source data such as Declarations of Intent for US Citizenship for McIntosh County, North Dakota, Campbell, McPherson (in process)

and several other counties of South Dakota, excerpts from English language community papers, and social items and translations from German language newspapers of the Dakotas. The capstone is GCRA's publication of the authenticated origins in Germany of those who lived in the colonies, complete with the FHL microfilm numbers, primarily the work of Gwen Pritzkau. Putting family descendants in touch with each other has been successful, and we are pleased that these research efforts typically result in finding many points of mutual interest that the researchers have allowed us to publish in the "GCRA Newsletter."

The library and office of the Glückstal Colonies Research Association is at 611 Esplanade, Redondo Beach, California, 90277-4130, and is open by appointment only. The following is a list of some of the workers and their projects for our group of villages:

BERGDORF, (Russ: Kolosowa, now Beregovoye), Odessa Province:

- Dianne Ladd, 249 El Cerrito Drive, Bakersfield, CA 93305-1326, Dladd623@aol.com
- Richard B. Wolff, 3403 3 Avenue, Castlegar, BC, Canada V1N2R5, rwolff@selkirk.bc.ca

BIRSULA, Odessa Province, (Kotovsk/Kuyalnik in Russ):

- Jan Huber Stangl, 1106 South Sterling Blvd., Sterling, Virginia 20164, tstanglsr@aol.com
- Murray Gauer, 1045 Quayside Drive, #1 102, New Westminster, BC, Canada 604-525-1037, morbeus@unisev.com

DREI BRUNNENTAL, Odessa Province:

- Paul Oberlander, 5135-45th Avenue, Minneapolis, MN 55417-1624

GLÜCKSTAL, (Russ: Glinnaya, now Glinnoye) Odessa Province:

- Marvin Hoffer, 105 Carroll Trail, Lewiston, MT 59457-3206, mjhoffer@tein.net

Immigrant Genealogical Society

© by Toni Perrone

The Immigrant Library

In 1976, Elisabeth Sharp and Gerda Hafner founded the Immigrant Library as a nonprofit association. Elisabeth donated her private library in its entirety and continued to donate books and funds through Sharp's bookstore. Gerda traveled to Europe many times collecting and searching out books for the library. The Immigrant Library was located in the back room of the Sharp Xerox Copy Shop and Bookstore in North Hollywood.

Workshops were held one night a week for the purpose of introducing the general public to the field of genealogy. Elisabeth and Gerda also offered private assistance. The German Genealogical Exchange Group, formed in 1982, developed as an outgrowth of these workshops for the purpose of fostering the exchange of research aides. The group enabled researchers in Germany to locate members of their family who had emigrated to the United States and, in exchange, they assisted American researchers in finding records of their ancestors in Germany. Because of the library founders' long-standing relationship with most German genealogical societies in the eight states of West Germany, there was a tremendous response to the announcement of the forming of this group. A request was sent out to genealogists in the area of the library asking for assistance in this endeavor. A membership fee of \$10.00 per year was requested to cover postage of the exchange and a monthly newsletter. The members of the group compiled a list of surnames and localities for use, so that an exchange of information could take place. Monthly meetings were held at the library.

The Immigrant Library Society

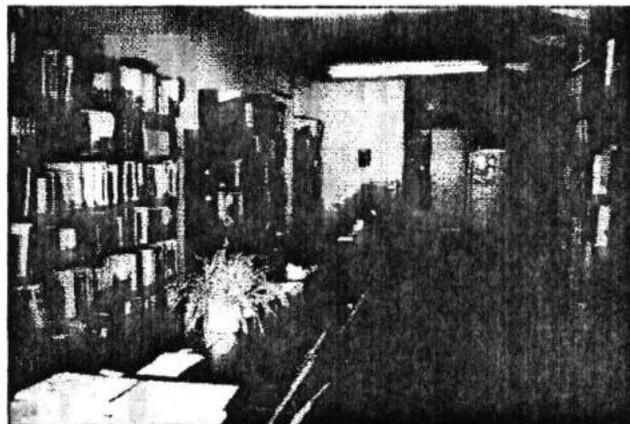

In 1983, associates of the library began holding monthly meetings as the Immigrant Library Society. In that same year, the activities of the Society expanded significantly. It began publishing a newsletter, with Elisabeth Sharp serving as editor, and, in March of that year, it began staffing the library with volunteers. Library volunteers were trained by Elisabeth Sharp. At first, the hours were Saturdays from 10:00 a.m. to 5:00 p.m. and Sundays from 12:00 a.m. to 5:00 p.m. In 1986, the hours were expanded to include Wednesday's from 12:00 p.m. to 9:00 p.m.

On 21 May 1983, the Society sponsored its first seminar and invited Friedrich R. Wollmershauser, a researcher from Germany, to be the first guest speaker. He spoke on three topics of significance to German research: "Finding the origins of 18th century emigrants," "When you write to Germany: Helpful Hints for Genealogical Correspondence to Germany," and "The Social Background of Early German Emigration." The Society has sponsored yearly seminars ever since. The next seminar will be held in conjunction with the FEEFHS 1999 International Convention.

The Immigrant Genealogy Society

In March of 1985 the Immigrant Library Society changed its name to the Immigrant Genealogical Society. Prior to this time the library and society were almost entirely funded by Elisabeth Sharp. Upon her husband's retirement and the realization that they were now a fixed income family, she was no longer able to carry the financial burden of the society and library alone. She enlisted the help of others, including the new president, Mary Louise Chittenden. They came up with a novel scheme to fund the Society and keep it operating. Society members would expand the work of the German Genealogical Exchange Group to include research for Americans for a small fee. Training sessions for volunteer record searchers were held in order to provide this new service. The volunteers would use the unique resources available in the German collection of the library to answer research queries. The name of the Society was changed to reflect a broader scope. It is no longer a society for the library's associates and patrons alone, but a society for people everywhere who are seeking help to trace their ancestors' origins, particularly in the German speaking areas of Europe.

The Immigrant Library in Burbank, California

As the Society has grown, so has the Immigrant Library. Soon the library needed more room to hold its many acquisitions. In the summer of 1989, the library was moved to its present headquarters at 1310 Magnolia Boulevard in Burbank, California. An open house was held the weekend of August 4, 5, and 6th. Eight years later, the library was again running out of space. On 10 January 1997 the board of directors voted to rent the adjoining building. This gave the library twice the space. A second open house was held March 7, 8, and 9th, 1997. The older part of the library is now devoted to books, tables and chairs and a copy machine. The film readers, map case, file cabinets with vertical files, computers, and stands, a lunch area and an office area are in the new room.

The Immigrant Genealogical Society was officially incorporated on December 31, 1985 in the State of California as a non-profit corporation. Non Profit status was granted by the IRS in July 1986. Donations to the Society are now tax deductible. Many IGS members have donated books to the collection, and tax deductible cash donations for the purchase of the Library materials are always welcomed.

Elections took place December of 1992 for officers of the German Genealogical Exchange Group. Those elected were President - Toni Perrone; 1st vice President - Jerry Timmons; 2nd vice president - Emma Lee Price; treasurer - Rosemary Moody; Secretary - Jane MacTague; Assistant Secretary - Mary Jane Smith; Locality and Surname Coordinator's - Mervin Niekamp and Fran Bauman; Immigrant Library Coordinators - Elisabeth Sharp and Gerda Haffner. Elisabeth Sharp continues to serve as the Newsletter editor.

Pan of the IGS Board (left to right): Lois Giordani, Lara Perkins, Marilyn Deatherage, Linda Stone, Jean Nepsund; (sitting): Barbara Freshwater and Marlene Nolte

The Society's Services

The Immigrant Genealogical Society offers many services to its members and to others seeking genealogical research assistance. The following is a summary of these services.

The Immigrant Library

At its headquarters on 1310 Magnolia Boulevard in Burbank, California the Society houses the Immigrant Library, an expansion of Elisabeth Sharp and Gerda Haffner's personal collection of German and American genealogical books. Although about half of the Library collection relates to American Genealogy, the library is best known for its sizable collection of German materials, many of which are not easily available elsewhere in the United States.

The library is open to the public 3 days each week, and is staffed by trained members of the Society. Use of the library is free to members, and a donation of \$2.00 per visit is requested from non-members. The library is open during the following hours: Wednesdays 12:00-5:00 p.m.,

Saturdays 10:00 a.m.-5:00 p.m., and Sundays 12:00 p.m.-5:00 p.m.

Some of the Special Collections purchased for the library include the following.

- German and Swiss and Italian telephone books on CD-ROM, including former East Germany.
- Deutsches Familienarchiv - over 100 volumes of German genealogies with indexes.
- Muellers Gazeteer, Shell Atlas, and extensive map collection
- Ortsippenbuecher: over 200-town lineage books
- Die Ahnenlisten Kartei - 14 volumes of indexes of German genealogists researching their ancestors
- Hessian Early Ancestors - Ancestral lines researched by members of the Hessian Genealogical Society
- Addresses of genealogists in Germany - ca. 11,000
- German, Russian, Czechoslovakian, Italian Immigration passenger arrival lists
- Emigration lists from Germany
- Familienkundliche Nachrichten - Gennap Queries
- Contemporary Folkfinder - 90 million Americans.
- 37 volumes of marriage abstracts from old Mecklenburg church books covering 1751-1800 (There are about 110,000 marriages indexed in this series.)
- 10 indexes of marriage abstracts from old Mecklenburg church books for the years 1705-1750 (Includes about 80,000 marriages.)
- Marriage abstracts from old Mecklenburg church books covering the period prior to 1704 (There are about 40,000 marriages indexed in this series. The earliest marriage is in 1604.)
- Census Indexes for Mecklenburg Schwerin 1704, 1751, and 1819
- Trauregister Niedersachsen for the year 1700
- Trauregister aus Deutschen Kirchenbücher - Schleswig Holstein for the year 1704
- Index to the New England Register on microfilm
- Schamburg Lippe church records on microfilm.
- Pommeranian Maps, Charts, etc. and surname indexes

The cataloging of the library collection was initiated February 1993. It has been a long tedious job and is an ongoing project. Carol Germer needs to be complimented for her work in this project.

Membership

Membership to the Society provides a monthly newsletter, the semi-annual periodical, and the free use of the Immigrant Library. Monthly meetings with genealogical speakers, classes, and seminars provide information about genealogical research and opportunities to share with other genealogists. Membership dues are \$20.00 per year for a regular membership. A family membership (\$25,00) is also available for 2 persons living at the same address. There are also several additional classes of membership. The

following is a list of membership categories and their corresponding yearly dues, in US dollars. The membership year begins when the dues are received by IGS.

- Regular member: \$20.00
- Family membership: \$25.00
- Contributing member: \$30.00
- Foreign Membership: \$35.00
- Supporting Membership: \$ 50.00
- Sustaining Membership: \$ 100.00

Montbly meetings

Meetings of the Society are held at the library on the first Friday of each month from 7:00 p.m. to 9:00 p.m. A different guest is invited to each meeting to speak on a topic of his or her choice.

Record Searches

Through its Research Committee volunteers, the Immigrant Genealogical Society opens the unique resources of the Immigrant Library to genealogists across the United States and overseas via mail requests. Searches now offered include German telephone books on C.D.'s; numerous maps, gazetteers, and atlases; indexes to surnames researched by German Genealogists; lists of Germans

Genealogists; published lists of arriving immigrants; and over 100 volumes of German Genealogies.

IGS Co-founder, Gerda Haffner

A request accompanied by a self-addressed stamped envelope will bring detailed information about searches currently offered. Flyers describing our searches are free to genealogical societies for distribution at their events. During 1993, IGS began offering two searches to genealogists in Germany. The response has been enthusiastic and persons in Germany have been able to contact descendants of relatives who emigrated to America. Branches of families in Germany are being reunited as well.

IGS does not provide private research services, only record searches of its library collection. However, we have compiled a list of persons offering to provide such private research assistance. A copy is free to anyone requesting it.

Immigrant index

Elisabeth Sharp started an Immigrants index in 1980 for the use of library patrons. This list has grown immensely

throughout the years and has been used by countless genealogists. Anyone can fill in the forms necessary to add their immigrant ancestor to the index and also to view the index in search of their families.

Translations

IGS encourages translation of German materials into English for publication. Persons fluent in German can help in these projects. Also, persons with limited knowledge of German can use and expand their skills by helping the Research Committee. German language classes are provided when interest is sufficient to warrant them.

IGS does not provide professional translation services. However, the list we have compiled of private researchers also includes professional translators.

Periodicals

In addition to the newsletter, the Society publishes *German American Genealogy*. First published in May 1987 under the editorship of Elisabeth Sharp, this periodical is now published in the spring and fall of each year. The present editor is Jean Nepsund. The staff accepts articles for publication about both American and European History, research methods, genealogical resources, and research experiences. Submissions of letters, family incidents, research successes and queries are also welcomed. Materials may be submitted in handwriting, typed copy, or ASCII disk. Submission will be deemed to grant permission for publication. The accuracy of the published material is the responsibility of the author. Spelling, grammar, punctuation and space will be edited. The periodical is free to members of the Society.

Seminars

Every year, the Society sponsors seminars that provide opportunities for more intensive instruction on genealogical research topics. Seminars usually include workshops, lectures, and a luncheon featuring a keynote speaker. The Fall 1999 Seminar will be held at the Airtel Plaza Hotel in Van Nuys, California on Saturday, 25 September 1999. This seminar will focus on German genealogy, featuring German researcher Henning Schröder, who will be speaking on the following four topics: "Historical Aspects of the Rhine Emigration to America: 17th to 19th centuries," "German Churchbooks: Their History, Content and Deficiencies," "Research in Eastern Germany: Formerly the GDR," and "Family Research in German State Archives.

Tue Seminar will be held in conjunction with the FEEFHS 1999 International Convention (Friday, Saturday, and Sunday, September 24th-26th) and the Glückstal Colonies Research Association (GCRA) 1999 Workshop (Thursday, September 24th). You can register to participate in all three events, if you wish. To register for the IGS Seminar, see our online registration form at <http://feefhs.org/conf/99laligsgg99.html>.

Research Behind the Iron Curtain

© by Detlef Papsdorf

[This article was originally published by the Immigrant Genealogical Society in the Spring 1995 issue of their semi-annual Journal, German American Genealogy. It is reprinted here with permission from IGS as an example of the quality of their publications. Written nearly ten years ago, this rather humorous and-for some- nostalgic journey back to the days of Cold War genealogy serves as a reminder of how far East European genealogy has come in the last decade. Many will also be curious to learn more about Papsdorfs personal collection of Saxony church books-Eds.]

Getting Started in Genealogy

I started genealogical research on Easter Sunday 1978, after my father, Herbert Papsdorf (died 1984) presented his three volume chronicle of our family to my older sister and me. I started to read it in the evening and continued all night long. When I had finished, I was in a tunnoil like never before in my life. To think, papa was injured seven times during World War 11-and lucky enough it was that he had been wounded, because all of his comrades went to Stalingrad and none of them survived, while he was lying in a lazarette (military hospital)! Then-to think about myself-born in 1944.

Most family chronicles, such as my father's, end quickly with the great-grandparents' generation, because verbal family tradition does not preserve very much about former ancestors. It was the same with my father's chronicle. The next day, Easter Sunday, I wrote letters and letters-exactly 14-to mostly Saxonian parishes. That meant fourteen letters to the German Democratic Republic-then East Germany ruled by the Communists.

Fourteen days later one of the most important answers came, the reply of Minister Müller in Pomssen near Leipzig. He "presented" four or five Papsdorf generations to us.

Visits to Saxony

Most of my fourteen letters were answered, only a few failed. So I went to Saxony with my parents and visited one of the "non-replying" villages east of Leipzig-tiny Mölbis. I learned why the minister did not reply-he could not read the old German handwriting in the church books! Neither could I-then. It was hard to learn it, especially because I never learned the old German "Sütterlin Schrift" in school. But due to my profession, I have a lot of experience with bad handwriting of doctors, and so I learned to read Old Script step-by-step, word-by-word. My ability improved year by year.

At first I wrote down church book entries by hand. But, when I started to work on them at home, doubts started. Did I read it in the right way? So, I began to think about the possibilities of taking photographs of records.

Filming Experiments

The next journey to Mr. Honecker's Paradise (East Germany), I went alone in my motor home, only accompanied by my Japanese camera and a few rolls of color slide film. I planned to take slides, which are cheaper than paper photos. Everything had to look "tourist like." A copying machine in my motor home would be inconceivable to East German guards. So, I took photos of all the entries which seemed important to me. But, I wrote down the entries, too. When I was back home again, I waited impatiently for my slides to come back from the developing company. When I put them into the projector, they were quite good, very sharp-only a little too dark. So, I did a "test production" at home to ascertain the best aperture when pages were white, yellow, or brown. Later I could adjust for these conditions by experience.

Then I went back to the German Democratic Republic, sometimes as often as eight times in one year! Thus I did my genealogical research, and was happy to "exhume" generation by generation.

Papsdorf Research

One day I happened to find a Papsdorf in one of the parish books. How interesting, I thought, and leafed along. It happened in Trages, near Leipzig, too, when I had not been able to reach my genealogical destination. I had to leave the GDR the next day and I could not find the ancestor for whom I was looking because the handwriting in the church book was very poor. At that time I needed a visa to enter the GDR. It was valid only for a certain time and normally could not be prolonged. So I weighed up two possibilities: to plan a second trip to Trages or to take photos of all the book now. I fortunately had films enough, so I started to copy the entire book, a small one, which took only about 12 rolls of film. When I passed the German-German border the next day with all the "nice guys" on the eastern side, I started to feel not very self-assured. But nothing happened. A few days later I was able to continue Trages research at home.

In the meantime, I bought a special slide projector with different magnification lenses. I was very glad to be able to solve genealogical problems at home, with the help of records which were reproducible and original. So, I avoided having to pay Mr. Honecker DM 25 (25 Deutschmark), the cost per person per day to visit Mr. Honecker's "most expensive zoo of the world" (a bitter saying of East German citizens). You had to exchange 25 West German DM for 25 East German DM.

Filming Becomes Standard Procedure

So I continued to film complete parish books just because I found the first experiment successful. When I found one ancestor in a book, I could be sure to find more

and more later on in the same book. I did not cause any confusion to the ministers at all. I came along with my big RV, had some presents, such as chocolate and coffee, and soon I became known locally. Often I was allowed to take the books down into my comfortably heated bus, so that I was not forced to sit in the cold offices. I took photos after photos, by day and by night.

When I had a good day and when pages were easy to turn, I managed to take up to twelve films per hour-which means about 400 slides. This was much, much more than any copying machine could produce. I closed all windows of my RV so nobody could notice the flash-flash-flash of my camera. Silly enough, I always forgot to cover the two skylights of my bus, which were made of transparent plastic, so the flashes of light must have been visible all around me!

I do not understand how it could happen that the East German Stasi (police) did not keep its eyes on me. Maybe they did-but I never had problems caused by my photography. When I came back to the German-German border after filming the gigantic parish books of Borna, I thought I MUST have overstepped the mark with my 189 rolls of film! That was about 8,000 slides which I have taken in five days.

One day I could hardly take my shower, because I was hardly able to keep the soap in my hand after having filmed all the day long. Of course I had no tripod in my bus-everything had to look amateur. I only needed my camera-the third one was a German Leica, because no. 1 and no. 2 soon went to Japanese camera heaven. Later on I made a "staatlich patentierter Kirchenbuchhalter (patented churchbook holder), a primitive but effective plywood table holder, with two clothespins and a rubber band to help keep the pages open. Not least of all was my supply of rolls of film-rolls and more rolls.

Border Crossing

On one occasion, having come to the border with my two well-hidden plastic bags full to the brim with celluloid information, I was forced to get out of my RV. I had never had to do that before. Being together with one or two East German customs officers inside your own camper, you can try to deflect their interest from the "hot zones" and to make them look at the "colder ones." But this time-they told me to get out of my mobile home and let them enter. I thought, "This is the end!" I feared it would be the end of my filming records! It was a young and pretty female officer who had given the order, but her older superior officer said, "No, it's O.K. Please go ahead with us for customs clearance." So, I went back with them into my bus and helped them "not to see ..."

When I was once again across the border into West Germany, I nearly kissed the ground. Our green uniformed customs officer laughed when I said to him, "I don't like uniforms, but today I am really happy to see yours!"

What persons like me had to "swallow" at this terrible border crossing, no one can understand. Even nowadays, when passing the invisible borderline, it's a shock for me,

and it will stay so during my lifetime. They have changed one of the most modern border complexes into a super modern Texaco filling station. Sorry, but I cannot buy gasoline there!

More Smuggled Film

Back to my smuggling. Slowly my archives grew and grew ... and took more and more space at home to the great pleasure of my wife, Claudia. Next I found a way to get even with Mr. Honecker. I used most of the 25 DM Zwangsumtausch (compulsory exchange sum) and bought East German films for that amount.

One year I went to Leisnig, a nice mountain town east of Leipzig, and convinced its minister to allow me to take photos. He did so, but asked me not to copy the entire book. What I did after that apparently did not have the benediction of the good LORD. When I got home, all my hard-won slides showed the same thing-the inside of a chimney by night!

I thought at first that this was the vengeance of Mr. Honecker. They had sold rotten films in a drugstore in Liebertwolkwitz- perhaps they had stored them on the hot water heater, I thought. After that I bought West German films, which I of course had to "import" into the GDR, which meant redoubling the risk. ("What are you doing with all these films in our socialistic paradise?")

When I went back to Leisnig, GOD was with me. The minister was on vacation and I copied all of the oldest books. I came home again and had the film developed. My slides on West German film showed-a West German chimney by night! I'm really not fooling! I concluded that the shutter of my Minolta camera was broken.

I went back to Leisnig and tried it again, a third time! After a week of work the minister noticed that I was copying all of his books. He threw me out. Fortunately he did so after I had copied the last page! This time, the film and camera were both in good shape, and the Leisnig films are one of my "special kids"!

My Papsdorfs Archive

During my "ancestor-shooting," I happened to stumble over Papsdorf members in the parish books again and again. I started to take the photos of these entries "eo passant" (as they occurred), until the idea struck me to start researching Papsdorfs all over the world. It eventually meant that I had to leave my research of other ancestors because the Papsdorf families all over the world took all of my time. Suddenly lots of churchbooks which I had photographed without very much interest, became very important because they contained only a few of my ancestors but a lot of Papsdorfs!

Border Trouble

In 1984 my coming and going to and from East Germany by motorhome suddenly came to an end when East German authorities refused to let me pass the border. "It's a new law, and motor homes are no longer welcome." So I turned around-but then came back-this time with a West

German television crew who were eager to broadcast a program about the latest GDR despotisms. Of course, the TV crew had to stay within the security of West Germany, while lonesome me in his motorhome drove to Honecker's "antifascist border wall." Oh yes—you are very lonely during such minutes! Believe it or not, the same officer who turned me back the day before met me. "Didn't I tell you yesterday that you are not allowed to pass with this type of truck?"

In the meantime I had learned my story well, and I contradicted the guard with a few paragraphs from the West German-East German transportation treaties. But he could not follow my explanations. I stood there about one hour until two higher, decorated officers came and asked me to get out of my rig. I was sure I would be arrested now! But they only told me that the Government of the German Democratic Republic does not allow me to enter with this vehicle. I asked them if it were really a matter of my bus—not my person. I protested, but finally turned around. I came back the next day with a small rental car.

One-half year later, getting an official entry permit for RV's was not longer a problem because of a new treaty between the two German states. Incidentally, the GDR guard was correct, because the old treaties did not talk about motorhomes. In the early 1960's nobody thought about touring the GDR with an RV. It was later that I learned this.

Arrested

At the end of October, 1984, I finally was arrested in East Berlin by the Stasi. They put me in prison for the "nicest 30 hours of my life." The reason for my arrest was that I had my legal gun with me. I had forgotten to leave it at home and had it with me when I passed that awful border. I was surrounded by four or five 6-foot-tall officers inside four fourteen foot walls. Since I am only 5.5 feet tall, one of these boys said to me, "Widerstand ist zwecklos" (Resistance is useless). They interrogated me until deep into the night. If you remember the poorest, hackneyed TV crime movie you have ever seen, believe me—word-for-word it was the East German Stasi that night. When they finally allowed me to "go to bed" (bed?), I astonished them when I cleaned my teeth with soap. They had never seen this before! My answer—"I never did it before."

Thirty hours later, after having to give up my gun and all the money I had with me, they let me go with only enough money for one tankful of gasoline. I was not allowed to enter the GDR, but must leave on the so called "Transit route" to Hesse, my homeland. During this nighttime 300-mile trip of boring highways I HAD to sleep a little while, not having

slept too well the night before, as you can imagine. When I came to the final GDR checkpoint between Thuringia and Hesse, they accused me that I had left the official transit route, because of being so late. I was arrested again—this time only for two hours.

Typical Crossing Events

What happened to me, and other border crossing people, surely could fill thick books. Most of the happenings have been terrible, some funny, most ridiculous. Situations like these occurred:

Officer: "Let's look under these RV berths."

Papsdorf: "Will you please hold this panelling for a moment?"

Officer: "No!"

Officer: "How can I know that there's water in your fresh-water tank? (the 40 gal. tank in my RV.)

Papsdorf (after a moment of being baffled): "We could open the faucet and let it flow out."

Officer: "Why are you riding in a motorhome and don't use a normal car?"

One time I was touring the GDR with my wife, Claudia. At the border I had to open all the outside covers of my rig as usual. When she concluded that everything was O.K., I was allowed to enter my RV and drive to the final checkpoint before entering West Germany. Suddenly my wife came hurrying on foot. While I was outside opening and closing the covers, the officers had told her to get out of the bus. At that moment I entered it, too jittery to notice the absence of my wife, and drove off leaving her standing alone in the "Niemandsländ" (No-man's-land).

Results

Between 1978 and 1990 I collected 65,000 slides of about 120 towns and villages in the triangle Leipzig-Döbeln-Altenburg. This is the largest collection of genealogical slides of Saxonian parishbooks in the whole world. I am very happy and proud to keep it. But—what happens to this treasure in the future? Colored slides do not last forever—and neither will I! Even in normal times these documents are hard to collect, and it was not during normal times that I collected them. My hair is getting a little grey now. I will be 50 years old in December, and there are most certainly a few grey hairs caused by my border-crossing experiences in securing slides of the original church records.

FEEFHS Webmaster's Report

© by John D. Movius, FEEFHS President and Webmaster

FEEFHS web site is worldwide. While the Internet is a worldwide reality, only a tiny fraction of the hundreds of millions of web sites can claim they are viewed on a worldwide basis. An important FEEFHS milestone came in March 1999 when a browser from Antarctica (.aq in the two letter language of Internet country codes) logged onto our web site for the first time. Thus, genealogists from all seven continents came here to search for stuff in March—a new first for FEEFHS.

A big increase in activity occurred after the LDS FamilySearch web site (www.familysearch.org) arrived on the scene. On first glance this might seem counter-intuitive. Were many of our old record searcher friends returning to our web site to seek access to answers not available elsewhere? Or were some of those 60 million searchers a day that couldn't log onto the FHL site dropping by ours while on the web? Who is to know?

May 1999 stats show hits arriving at an annualized rate of 11 million, up from 8 million in 1998, 5 million in 1997, 2 million in 1996, and 0.5 million in 1995. Currently 242,000 online indexes are created by our SWISH search engine. It indexes 4,125 pages on this 145 Meg web site. About 20 Megs are maps, the rest is text with hyperlinks.

Myron Grunwald Memorial Fund Status: Contributions continue to arrive for the Myron Grunwald Memorial Fund. The fund currently has a Bank One savings balance of US\$1,629, thanks to US\$280 in donations sent with FEEFHS membership renewals and continued support from Myron's daughter, Gayle O'Connell, and from IGS. A first page appeal by Ted Fetkenheuer in his latest *Die Pommerschen Leute* newsletter is generating renewed interest by Myron's many subscribers and benefactors.

Web operating expense donations up. It's very heartening to your webmaster to know many FEEFHS subscribers have chipped in. It is also gratifying that renewal subscribers contributed over US\$510 toward the web site operating expense. This is enough to pay about 3 months operating expenses for co-locating our 8-year old Sun IPX server on a T-1 line at Salt Lake City Utah and our mirror site for our map room on a T-3 line at DCN in Davis, California.

P5-200 MMX (faster web server): This hot web server, with two Ultra Fast SCSI hard drives, is expected to be available by mid-July. The mods it will need include the addition of a Solaris 2.7 (latest UNIX web server class) Operating System and the addition of beaucoup RAM—something a web server can never seem to swallow enough of. While we will be dependant on the schedule of others to modify and configure it, I'm hopeful we'll have cut over on the web to this faster and more powerful web server by sometime this August.

Bogus 404's: In the meantime, many persons continue to report "404" problems to the webmaster, especially during US times of peak activity (noon, evenings, weekends and holidays). The problem is usually not a broken link. Rather it results from the wide bandwidth of the T-1 Internet connection "pipe" at *Burgoyne.com*. It dumps many requests per minute, inundating our old Sun IPX web server at peak periods.

How to spot a "bogus 404": You can recognize a "bogus 404" by immediately clicking on the reload button of your Netscape or other browser when it occurs. If the 404 is bogus, the page you sought will appear on reloading. That means the real problem was excess load on our server, not a broken link.

Are there real 404's on the FEEFHS web site? Of course! Your webmaster has a done post-graduate studies in creating his share of real 404's while hand coding all pages on this site. And with over 70,000 internal navigation links, the FEEFHS Web site probably is hovering near the WWW average of having about 1% of them broken.

How to report a real 404: There are two flavors: "theirs" and "ours". If the link is broken to one of our FEEFHS pages coming from a page on another web server—like a WWW search engine, Cindi's List, or some other friendly home page—then the problem is an obsolete link there, not here, and they need to hear about the correct URL from you.

If the 404 was actually caused by us—and this webmaster is still able to create such mistakes—the *html coding error is on the page you were on when the 404 occurred, not on the page you were seeking.*

Significant Additions October 1998-June 1999

[[Best Genealogy Search Engines](#)] [[FEEFHS Genealogy Toolkit](#)]
 [[Ethnic, Religious, National Index](#)] [[Location \(Address\) Index](#)]
 [[Significant Additions 1998](#)] [[Map Room](#)] [[FEEFHS FAQ's](#)] [[WebPortal Index](#)]

F E E F H S FrontPage

THE Pioneer Web Portal for Central and East European Genealogy since May 1995

Federation of East European Family History Societies

P. O. Box 510898, Salt Lake City, Utah 84151-0898

Wednesday 7 July 1999, 2200 hours Mountain Daylight Time (GMT-0800)
Use our [WebPortal Index](#) to find all unique words on this 147.8 Meg web portal

A new 13 Meg WebPortal Index was just created by the FEEFHS full text search engine. Use our [WebPortal Index](#) to find a hypertext index to each of the 246,327 Central and East European surnames, locations and other unique words in the 4,183 files here.

This "destination" Web Portal will provide answers to many of your Central and East European genealogy questions and will refer you to specific FHL microfilm / genealogy book sources for your surnames / locations if we have found them.

In the past, *FEEFHS Newsletter* and its successor *FEEFHS Quarterly* have included a fairly complete list of recent additions to the FEEFHS home page at <http://feefhs.org>. Beginning with this issue, the web update will highlight some of the more important additions to the site instead of a complete listing. An exhaustive list of the latest postings will still be found online through the Significant Additions Index. (As of the writing of this article, the latest update of the on-line Significant Additions Index was October 1998. It is anticipated that by the time this issue is delivered to our readers, the index will be updated to include 1999 additions to the web site.

1999 FEEFHS Convention Home Page
<http://feefhs.org/conf/99la/99la-hp.html>

Perhaps the most significant posting on the FEEFHS web site at this time is the home page for the FEEFHS Fifth International Convention. This page contains a preliminary

program of speakers and lecturers, recent announcements from the convention's co-sponsors, and directions to help you find the Airtel Plaza Hotel in Van Nuys, Ca., where the convention is to be held. The page will soon contain a convention registration form, a form for vendors, and a complete convention schedule. The convention is being held Friday 24 September 1999 through Sunday 26 September 1999 in conjunction with the Immigrant Genealogy Society (IGS) and Glückstal Colonies Research Association (GCRA).

Ahnenstammkartei (Leipzig Films) Indexing Project
<http://feefhs.org/fij/ahnstamm.html>

Check out this page to find the latest news on the progress of this indexing project of the largest collection of German pedigrees in the world. You, too, can get involved as a volunteer indexer. This page tells you how.

Bibliography of East European Maps

<http://feefhs.org/frl/maps/eurmaps.html>

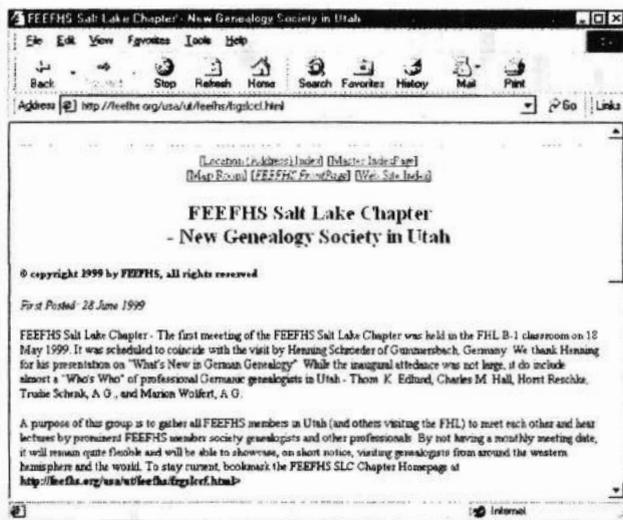

This bibliography was compiled by Thomas K. Edlund, Senior Librarian of Slavic Bibliography at the Family History Library and Editor of *FEFHHS Quarterly*. The bibliography covers maps from Albania to Yugoslavia, as well as regional maps of Eastern Europe. All of the maps in the bibliography are available at the Family History Library.

Czech and Slovak Research Update

<http://feefhs.org/fj/czsk/dg-skmf2.html>

Duncan Gardiner, C.G., A.G., a leading Czech and Slovak genealogist, recently completed a research trip to Slovakia and the Czech Republic. He shares some of his observations about the accessibility of the archives in those countries, provides an update of the status of microfilming there, and suggests a few book titles that are useful to Czech and Slovak researchers.

The new FEEFHS Salt Lake Chapter home page

FEEFHS Salt Lake Utah Chapter

<http://feefhs.org/usa/ut/feefhs/frgslccf.html>

The first local chapter of FEEFHS was organized on Tuesday 18 May 1999 at the Family History Library in Salt Lake City, Utah. Monthly meetings will be held where Central and East European Genealogists can hear lectures, share knowledge, and provide mutual help. The new chapter will provide support for the FEEFHS 2000 International Convention, which will be held in Salt Lake City. Chapter members will also be able to assist in indexing FHL microfilm reels and creating finding aids.

Founders of the FEEFHS Salt Lake Chapter are FEEFHS President John Movius and Charles Hall. Founding officers include Movius as president, FHL cataloger Shon Edwards as vice president and FHL cataloger Allan Morgan

as secretary-treasurer. The advisory board includes Charles M. Hall and Thomas K. Edlund.

The site provides information about upcoming chapter meetings, projects, and other events.

FEEFHS Saxony Court Records Project (FSCRCP)

<http://feefhs.org/de/sax/fscrp/fscrp-hp.html>

This site provides details about FEEFHS project to index the Saxony court records. For over 50 years, the Genealogical Society of Utah (GSU) has been unable to obtain approval from Saxony church authorities to microfilm Saxony church records. Because of this, the GSU has been microfilming the court records as a substitute. These records include contracts, land and title records, wills and probate, loans, power of attorney, and many other court records. They describe in various detail aspects of the lives of those persons living in Saxony during the 17th century through about the mid 19th century who came in contact with the court for various reasons.

Since 1993, 14, 407 microfilm reels of these court records have been filmed. So far, records from 76 of the 113 Amts (court districts) of Saxony are available through the Family History Library. There is no index available to these records. FEEFHS has taken upon itself the task of indexing these records. Volunteers are needed to index the 113 Findbücher (finding aids) for each of the Amts. More volunteers will be needed to create a surname index to all of the films.

This page gives information about the progress of the project, how to get involved as a volunteer, and more about the genealogical value of these records.

Polish Archival Finding Aid

<http://feefhs.org/ah/gal/bookrev.html>

Gayle Schlissel Riley has provided a review of a new book, published in Poland, that gives the location of church books and civil registration documents in Polish archives. The book is titled *Ksiegi Metrykalne i Stanu Cywilnego w Archiwach Państwowych w Polsce* and was published in 1998 by the Polish Central Department for Archival Information. This web page gives some basic information about the book, some advice on how to use it, and a list of the abbreviations found in the book with an English translation.

Utah German Genealogical Society (UGGS) Home Page

<http://feefhs.org/usa/ut/uggs/frg-uggs.html>

The Utah German Genealogical Society was formed at an organizational meeting held 3 February 1999 at the Family History Library in Salt Lake City, Utah. The society is intended for Germanic genealogists living in Utah as well

Web Update

those who come to Utah to do research (in person or online). Membership is open to all Germanic genealogy record searchers in Utah, North America and elsewhere.

The UGGS home page lists the officers who were elected at the organization meeting and includes information about how to contact UGGS, how to become a member, details of past meetings, and announcements about upcoming meetings.

What is Happening at the Family History Library?

<http://feefhs.org/fij/fhl/fhl17699.html>

This page contains a report on lecture written by FHL director Jimmy Parker on 17 June 1999. The lecture included a brief summary of the history of the library and the Genealogical Society of Utah (GSU), a statement of the library's current philosophy, and a general report on the status of GSU microfilming projects. The lecture also described the new technologies and products being used by

the GSU, including the new censuses on CD-ROM, the FamilySearch Internet Genealogical Service, and the new cataloging system at the FHL. Some of the facilities of the FHL were also described. This page contains detailed notes on this lecture for anyone who is curious about what is new at the FHL.

Y2K Home Page

<http://feefhs.org/y2k/bcy2k-ps.html>

Does the genealogist need to worry about Y2K? Check out this page and see how. Depending on the type of computer you have, you may have little to worry about, or you may decide that you need to buy a whole new computer. The page contains information about bringing your personal computer into Y2K compliance and shows how specific computers and operating systems might perform come the year 2000. Provides dozens of links to other helpful Internet sites about the Y2K problem.

The Y2K page has dozens of links to other helpful Internet sites with info about the Y2K problem. This is Microsoft's Y2K Portal Page, accessed via a link on the FEEFHS page.

The screenshot shows a web browser window with the following elements:

- Browser Title:** Welcome to the Year 2000 Portal Page
- Address Bar:** http://www.microsoft.com/y2k/
- Page Header:** Microsoft logo and navigation links (All Products | Support | Search | microsoft.com Guide)
- Main Content:**
 - Welcome to the Year 2000 Portal Page**
 - Microsoft Year 2000 Guide for Home Computers**: In order to provide in depth Year 2000 information for both the IT Professional and the home computer user, Microsoft has created the Microsoft Year 2000 Guide for Home Computers in addition to the Microsoft Year 2000 Readiness Disclosure & Resource Center. Customers now have the opportunity to assess the Y2K challenges they face not only in a large business environment, but also in a small business and home computing environment. Both sites provide in depth product information, as well as frequently asked Y2K questions, and links to other Y2K sites. Microsoft is committed to providing the information you need to evaluate the impact of the Year 2000 on your computing environment.
 - Microsoft Year 2000 Readiness Disclosure & Resource Center**
 - Microsoft's Year 2000 Guide for Home Computers**: The Microsoft Year 2000 Guide for Home Computers is designed to help consumers understand and prepare for the Y2K challenge. The site navigates users through an easy-to-use tutorial, which helps users to identify potential challenges they may face in making the transition into the Year 2000. The site includes an exploration of hardware, software, and personal files and helps users create a plan to address the year 2000 challenge.

Draft Program
Speakers and Dates (as of 10 June 1999)
FEEFHS 1999 International Convention
Airtel Plaza Hotel and Convention Center, Los Angeles (Van Nuys), California
Friday-Sunday, 24-26 September 1999

This schedule is still growing and additional speakers are welcome. Except as noted, the speakers, topics and dates have been confirmed. Arrangements will be made, if possible, to a repeat a lecture, if registrants call for it, contact the convention chairman. Speakers biographies are linked to a full version of this page on the FEEFHS web site at <http://feefhs.org/conf/99la/lectures.html>. Check the FEEFHS 1999 International Convention home page at <http://feefhs.org/conf/99la/99la-hp.html> for late additions.

Marilyn Abigt of Fallbrook, CA. Professional genealogist with German and German-Jewish specialties

- Saxony & Thüringen genealogy - OLD Sources Available before the Fall of the Wall -- Friday
- Saxony & Thüringen genealogy - NEW Sources Available after the Wall's Fall -- Sunday

John C. Alleman of Salt Lake City, UT. Professional translator, co-founder of FEEFHS

- Mastering the Use of Foreign Languages on Your Computer and on the Internet -- Saturday
- Brick Wall Language Workshops -- Friday, Saturday and Sunday

Donna Debevec Cuillard of Simi Valley, CA. FHC Director, member of Slovenian GS International Board

- Slovenian Research - USA Sources -- Friday
- Slovenian Research - A Case Study -- Friday
- Alternate Sources - Intermediate I of II -- Saturday
- Sleeping Cities - Cemetery Records -- Sunday
- Pennsylvania Research -- Sunday

Fay Dearden of Payson, AZ. Genealogy author and lecturer (Tentative)

- How to Use the Meyers Orts- und Verkehrs-Lexikon -- Sunday
- Brick Walls: Meyers Orts- und Verkehrs-Lexikon -- Sunday
- (A microfiche reader and set of Meyers fiche will be available to solve personal problems as time.)

David L. Dreyer of South San Francisco, CA. Banat record searcher, AkdFF member, San Bruno FHC volunteer

- Discovering the Village of Origin in the Banat region using American record sources -- Saturday
- Century Old Ship Passenger Lists (to N.Y. & Baltimore from Bremen & elsewhere) -- Saturday
- Panel: Banat and Batschka (with Gordon McDaniel) -- Sunday

Thomas K. Edlund, M.L.S. of Salt Lake City, UT. Senior Librarian for Slavic Bibliography, Family History Library; Editor of FEEFHS Quarterly

- Researching Black Sea German-Russian Ancestors, including EWZ, Church Registers etc. -- Friday
- Workshop 1 of 3: Genealogy Research - General Principles and Resources -- Friday
- East European Maps - Selecting the best from the FHL collection for your research -- Saturday
- Workshop 2 of 3: Conducting Research in FHL archives - General Principles and Resources -- Saturday
- The German Minority (Jewish) Census of 1939 : How to use this collection -- Sunday
- Workshop 3 of 3: Research in archives of Central and Eastern Europe - how to do it -- Sunday
- Die Ahnenstammkartei des Deutschen Volkes collection - workshop using examples -- Sunday

Irmgard Hein Ellingson of Ossian, IA.

- 19th and 20th Century Volhynia: Historical Overview and Research Resources -- Friday
- The German Settlement in Galicia: Historical Overview -- Saturday
- Eastern European Research: Primary Sources and Oral History -- Saturday
- The Multi-Ethnic Eastern Austro-Hungarian Empire from 1785-1945 -- Sunday

Joseph B. Everett of Salt Lake City, UT. Slavic Cataloger, Family History Library; Managing Editor of FEEFHS Quarterly

- Census Records of the Russian Empire -- Friday
- Introduction to Belarus Research

Jim Faulkinbury, C.G.R.S. of Sacramento, CA. Immigrant Research and U.S. Naturalization Records expert

- California Resources of Importance to Central and East European Record Searchers. -- Saturday

-U.S. Naturalization Records From the Colonial Period to Today: Types, Content, Locating Records -- Sunday

Theodor L. Fettkenheuer of Mesa, Arizona, Editor of *Die Pommerschen Leute*

-Panelist: Pomeranian Genealogy for Germanic Record Searchers (with Jean Nepsund) -- Friday, Sunday
-Gathering: *Die Pommerschen Leute* subscribers/Pommern genealogists -- Friday, Saturday, and Sunday

Margaret Aman Freeman of Redondo Beach, CA, Founding Co-Chair of Glückstal Colonies Research Association (GCRA)

-Benefits of Village Research in Your Personal Search for Ancestors -- Friday

FEEFHS 1999 International Convention Registration Form

The convention will be held at the Airtel Plaza Hotel and Conference Center in Van Nuys, California. The entire convention runs four days: September 23rd-26th, 1999. The FEEFHS convention runs three days, September 24th- 26th. It is being held in conjunction with the Immigrant Genealogical Society (IGS) 1999 German Genealogy Day on Saturday, September 25th and the Glückstal Colonies Research Association (GCRA) 1999 Workshop on Thursday, September 23rd. You may use this form to register for all three events, or to register to participate in specific parts of the convention. You may also use this form to buy tickets for any of the meals sponsored by the three participants.

1999 Syllabus: US\$20.00 at the Convention (Postage and handling to be determined)

Vendor Tables: To reserve table, contact John Movius at (801) 284-5917. There are a limited number of tables available. **Fees:** non-profit member societies: US\$40.00; member commercial vendors and non-member non-profit societies: \$US50.00; Non-member commercial vendors: US\$75.00. Make your check payable to FEEFHS and mail it to P.O. Box 510898, Salt Lake City, UT 84151-0898. Your check is your reservation.

FEEFHS membership saves you money when registering. A significant advantage is gained by joining FEEFHS at the time of registration. In this way, you can obtain registration and/or Vendor tables at the FEEFHS member rate. **Annual Membership Dues: Member:** Society/Organization, Professional or Personal: US\$25.00 minimum **Sponsor:** (medium sized societies - i.e up to 500 members): \$35.00; **Patron:** (larger organizations: i.e. over 500 members): \$50.00; **Commercial membership** (includes a 1 Meg mirror site): US\$50.00; Commercial 2 Meg Home Page or mirror site: US\$65.00 per year.

Registration forms: This registration form is now posted on the FEEFHS web site under the 1999 Convention Home Page at <http://feefhs.org/conf/99la/99la-hp.html>. For a copy of the Registration Form by mail, send a self-addressed stamped envelope to FEEFHS, P.O. Box 510898, Salt Lake City, UT 84151-0898.

Hotel accommodations: Airtel Hotel and Conference Center: - (Sherman Way at Van Nuys Airport) - 7277 Valjean Avenue, Van Nuys, CA 91406. To make reservations, call 1-800-366-3684 (or FAX 1-818-785-8864) and ask for the **FEEFHS Group Rate** US\$75.00 (+tax = US\$85.40) a night. This is a great rate for such an attractive hotel and a competitive rate for Los Angeles. This rate includes free parking and free shuttle service to and from the nearby LAX Airport Satellite Ground Transportation Terminal. The deadline is 9 September 1999.

Registration Fees (Thursday 23 September - Sunday, 26 September 1999):
